

Prison Populations

SPACE I - 2018

Marcelo F. Aebi
Mélanie M. Tiago

This report has been produced by Marcelo F. Aebi and Mélanie M. Tiago on behalf of the Council for Penological Cooperation (PC-CP) of the Council of Europe, Strasbourg, France.

The report has been prepared under a contract with the *Action against Crime Department, Information Society and Action against Crime Directorate, DGI - Directorate General Human Rights and Rule of Law* of the Council of Europe. It has also received support from the University of Lausanne, Switzerland.

Country-based information on penal institutions and prison populations was collected through the *SPACE I 2018* questionnaire (Ref: PC-CP (2018) 12) and analysed by the authors of this report.

The responsibility for the content of this report lies with the authors, and the views expressed in it do not necessarily reflect the official policy the Council of Europe; nor is the PC-CP responsible for any subsequent use that may be made of the information contained herein.

Highlights of the 2018 SPACE I report

The main results of the 2018 SPACE I report are presented in a separate booklet (Prisons and Prisoners in Europe 2018: Key Findings of the SPACE I report), which includes some indicators of the trends observed since 2008 and the changes experienced since the publication of the previous report. This section summarizes the situation in 2018 through two Tables. Table A shows the European median values for a series of selected indicators. Table B presents the same indicators by Prison Administration. Only the Prison Administrations that answered the questionnaire are included in Table B. They are divided in three clusters according to their score on each indicator:

1. **High:** This cluster includes the Prison Administrations whose score is higher than the European median value by more than 5%. In order to simplify the reading we indicate that they are **above** the European median value.
2. **Medium:** This cluster includes the Prison Administrations whose score is **close** (i.e. between -5% and +5%) to the European median value
3. **Low:** This cluster includes the Prison Administrations whose score is lower than the European median value by more than 5%. In order to simplify the reading, we indicate that they are **below** the European median value.

The number of Prison Administrations included in Table B varies for each indicator, because not all the countries provided data for all of them. Two of the countries that answered the SPACE questionnaire (United Kingdom and Spain) have more than one Prison Administration. When the Table includes only the name of one of these countries, it means that the three Administrations of the United Kingdom and/or both Administrations of Spain are in the same cluster. Otherwise, each Prison Administration is mentioned separately.

TABLE A: EUROPEAN MEDIAN VALUES FOR THE MAIN PRISON INDICATORS, 2018*

	Median values
Prison population rate (44 PA)	102.5
% of female inmates (44 PA)	5.0
% of detainees not serving a final sentence (43 PA)	22.4
% of foreigners (43 PA)	15.9
Prison density (43 PA)	91.4
Ratio of inmates per staff (43 PA)	1.6
Rate of releases (38 PA)	110.6
% of deaths by suicide (42 PA)	22.7
Rate of escapes (43 PA)	8.6
Average length of imprisonment, in months (based on the stock and flow) (40 PA)	8.2

*In principle, the median is based on data for 44 European Prison Administrations (PA). However, in some cases the number is lower because not all the PA provided data for all indicators. The exact number of PA included is indicated between brackets for each indicator. Furthermore, a list of the PA that provided data for each indicator can be found in Table B below.

TABLE B: RANKING OF COUNTRIES ACCORDING TO THE MAIN PRISON INDICATORS, 2018 (OR 2017)

	High: Above the European median value	Medium: Close to the European median value	Low: Below the European median value
Prison population rate	Armenia, Azerbaijan,, Czech Rep., Estonia, Georgia, Latvia, Lithuania, Luxembourg, Moldova, Montenegro, North Macedonia, Poland, Portugal, Romania, Russia, Serbia, Spain, Slovak Republic, UK: E&W, UK:SCO.	Austria, Bulgaria, France.	Andorra, Rep. Srpska, Croatia, Cyprus, Denmark, Finland, Germany, Greece, Iceland, Ireland, Italy, Liechtenstein, Monaco, Netherlands, Norway, San Marino, Slovenia, Sweden, Switzerland, UK:NIR.
% of female inmates	Andorra, Austria, Cyprus, Czech Rep., Finland, Germany, Greece, Iceland, Latvia, Luxembourg, Moldova, Norway, Portugal, Russia, Slovak Rep., Slovenia, Spain, Sweden, Switzerland.	Estonia, Lithuania, Netherlands.	Armenia, Azerbaijan, Rep. Srpska, Bulgaria, Croatia, Denmark, France, Georgia, Ireland, Italy, Liechtenstein, Monaco, Montenegro, North Macedonia, Poland, Romania, San Marino, Serbia, UK.
% of detainees not serving a final sentence	Andorra, Armenia, Croatia, Cyprus, Denmark, France, Greece, Italy, Latvia, Liechtenstein, Luxembourg, Monaco, Montenegro, Netherlands, Norway, San Marino, Sweden, Switzerland, UK:NIR. Introduction

The SPACE I 2018 annual report is part of the SPACE project¹. This project provides an overview of the use of custodial (*SPACE I*) and non-custodial (*SPACE II*)² sanctions and measures in the Member States of the Council of Europe (CoE) by means of two annual reports.

SPACE I focuses on **prison populations** and the **penal institutions** in which they are held. Data for the SPACE I report are collected by means of a questionnaire agreed by the Council for Penological Co-operation (PC-CP) of the CoE and sent every year by the research team of the University of Lausanne (UNIL) to the Prison Administrations of the CoE Member States. The aim is to obtain data that are comparable across States. However, any **comparisons** of the **levels** (in rates, ratios and percentages) shown by the countries according to different indicators are always problematic and must be conducted **very cautiously**. This is due to the fact that the way in which data are collected in different countries varies from country to country. These variations in the data collection methods introduce **artificial differences** across countries. For that reason, since 2004, the SPACE I questionnaire includes questions on the way in which data are collected (known as **metadata**) in each country, which help explain these artificial differences between countries. Thus, the questionnaire aims at identifying, and whenever possible reducing, differences in the way in which categories are defined and data are gathered in the national statistics of each country. Some of the main differences across countries are due to divergences in the categories of inmates included in the prison population (see *Table 2.1* and *Table 2.2*); in the way in which the capacity of penal institutions is estimated (see *Table 17*); in the way in which entries into penal institutions as well as exits from them are defined (see *Table 24* and *Table 26*); in the categories of personnel included in the total number of staff (see *Table 20*); or in the items included in the budget spent by the Prison Administration (see *Table 34*).

The questionnaire is filled by the national correspondents in each Prison Administration and sent back to the team of experts of the University of Lausanne (UNIL), which undertakes a **procedure of data validation** that involves a multilevel counterchecking of the information received. In that perspective, significant inconsistencies and visible *outliers* (corresponding to very high or very low values) are identified as the data are introduced in the database through a series of control tables. In such cases, the countries that provided the data are contacted and asked to check the figures or explain the reasons for the inconsistencies. The revised figures or explanations are then introduced in the database, which sometimes leads to further exchanges between the UNIL research team and the national correspondents. After that, a first draft version of the SPACE I report is produced and circulated among colleagues, who may identify other inconsistencies which can be solved before publication. Nevertheless, despite this data validation procedure, there are some **inconsistencies** that cannot be fully elucidated (and in that case the figures are presented between brackets) and there may be others that have not been identified before the publication of the final report. In that context, any readers' comments, notes or criticisms are welcome. The **Notes** to the tables included in the SPACE report provide an additional and invaluable source of information about the data included in the tables. In that perspective, the golden rule for users of SPACE I is to **avoid using the data included in SPACE I without taking into account the notes and comments related to that data**.

SPACE WEBSITE

In addition to the data presented in this report, the Website of the SPACE project provides supplementary information related to the use of custodial and non-custodial sanctions across Europe (e.g. recidivism studies, useful links and addresses concerning the Prison and Probation Administrations).

¹ Website of the SPACE Project: www.unil.ch/space.

² Aebi, M.F. & Hashimoto, Y.Z. (2018). *SPACE II – Council of Europe Annual Penal Statistics: Persons serving non-custodial sanctions and measures. Survey 2018*. Strasbourg: Council of Europe.

OVERVIEW OF THE CONTENTS OF THE 2018 SPACE I REPORT

Figures on prison populations as well as on staff employed by Prison Administrations relate to **31st January 2018** and are known as *stock* indicators. The date of 31st January is preferred to 1st January because the number of inmates decreases between the end/beginning of the year holiday season due to temporary releases that allow inmates to spend the festivities with their families. It is also preferred to 1st September (used in SPACE I from 1983 to 2016) because it is closer to the date of publication of the report. When data on 31st January 2018 were not available, the Member States were asked to use the closest possible date of reference. The exceptions are expressly stated in the notes to the Tables concerned. These indicators are presented in **Section 1** of the report.

Data on admissions into penal institutions and exits from them, as well as on the total number of days spent in these institutions and the budget spent by the Prison Administration, relate to the whole **year 2017** and are known as *flow* indicators. These indicators are presented in **Section 2** of the report.

In 2018, the forty-seven member states of the Council of Europe counted *fifty-two* Prison Administrations under their control.

Data are not collected for the following geopolitical entities: Crimea, Transnistria, Abkhazia, South Ossetia, Nagorno-Karabakh, the northern part of Cyprus, and the Danish (Faroe Islands) and United Kingdom Dependencies (Gibraltar, Guernsey, Isle of Man, and Jersey). Data for Belarus and Kosovo are not collected because they are not members of the CoE.

MAIN MODIFICATIONS INTRODUCED IN 2018

- The questionnaire has been entirely restructured and reorganized.
- The reference date for the stock indicators is **31st January of the current year (2018)** instead of 1st September of the previous year.
- The reference year for the flow data is the **previous year (2017)** instead of the year before last.
- The definitions of some items, as well as the inclusion and exclusion criteria for some categories, have been improved.
- Prison Administrations are asked to indicate explicitly whether their definitions fit the ones proposed in the questionnaire.
- The new general category of *exits* includes *releases, inmates who died in penal institutions and escapes from penal institutions*.
- Data concerning inmates who died in penal institutions exclude the inmates who died outside the penal institution (e.g. during a permission for a temporary leave).
- A distinction has been introduced between prisons *with public-private partnership, private prisons and other private facilities*.
- The category *persons under security measures/preventive detention for dangerous offenders* includes two subcategories: *persons held as not criminally responsible by the court* and *persons held as totally or partially criminally responsible by the court and who have been sentenced to imprisonment*.

CONVENTIONS AND STATISTICAL MEASURES

The following conventions and abbreviations are used throughout the report.

Conventions used

NAP or ***	Not applicable: The question is irrelevant; the item refers to a concept not found in the penal system of the country concerned.
0	Zero: The concept exists in the penal system of the country concerned, but there are no cases (the number of cases or persons is zero).
NA	Not available: There are no figures available, but the concept exists in the penal system of the country concerned.
(number)	Data are presented between brackets when the validation procedure revealed inconsistencies that cannot be explained.
	The box is left blank when the country also left it blank in its answer to the questionnaire.

All the comments by the countries as well as the mentions of discrepancies between the national definitions and the ones used in SPACE have been grouped in the notes to the relevant Table.

Measures of central tendency

In Tables containing rates or percentages, the following measures have been used to describe the distribution of the data:

Mean (Average): The arithmetic mean is the outcome of dividing the sum of the data supplied by the total number of countries. The mean is sensitive to extreme values (very high or very low values).

Median: The median is the value that divides the data supplied by the countries concerned into two equal groups so that 50% of the observations are above the median and 50% are below it. The median is not influenced by very high or very low values.

Minimum: The lowest value in the given column of the Table.

Maximum: The highest value in the given column of the Table.

Merged categories are not included in the calculation of these measures.

In order to avoid duplication of data, the total calculated for the whole territory of Spain (addition of the figures for the National Administration and the Catalan Administration) is not included in the computation of the average and median European values.

Disclaimer: For reasons of accuracy we have calculated the mean and median values from the original database, which contains all the decimals not presented in the Tables. Readers who rework the calculations from the data presented in the Tables - which only contain one or two decimals - will therefore reach slightly different results than the ones presented in the report.

DEMOGRAPHIC DATA

The rates per 100,000 inhabitants presented in this report have been calculated using as a reference the population of each country on 1st January 2018 as available on the *Eurostat* Database (“*Population on 1st January by age and gender*”).

Exceptions: When population figures were not available in the Eurostat Database or when the information provided by a national correspondent referred to a different territorial division than the one used in that database, we used the following sources:

Andorra: Demographic data refer to 1st July 2018. Retrieved from <https://population.un.org/wpp/DataQuery/> on 20th December 2018.

Azerbaijan: Demographic data refer to 1st July 2018. Retrieved from <https://population.un.org/wpp/DataQuery/> on 20th December 2018, and include the population of Nagorno-Karabakh.

Bosnia and Herzegovina (Republika Srpska): Demographic data are estimates and relate to mid-2017. The estimates are done on the basis of the natural changes of population and migration <http://www2.rzs.rs.ba> (retrieved on December 20th, 2018).

Monaco: Demographic data refer to 1st July 2018. Retrieved from <https://population.un.org/wpp/DataQuery/> on 20th December 2018.

Russian Federation: Demographic data refer to 1st July 2018. Retrieved from <https://population.un.org/wpp/DataQuery/> on 20th December 2018.

San Marino: Demographic data refer to 1st July 2018. Retrieved from <https://population.un.org/wpp/DataQuery/> on 20th December 2018.

Spain – Catalonia: Data retrieved from <https://www.idescat.cat/pub/?id=aec&n=245&lang=en> on 20th December 2018.

Spain – State Administration: Demographic data is an estimation made by the authors based on the demographic data of Catalonia and the whole territory of Spain.

UK: England & Wales: Demographic data is an estimation made by the authors based on the demographic data of the United Kingdom provided by Eurostat minus the population of Scotland and Northern Ireland (see below).

UK: Northern Ireland: Demographic data refer to July 2018. Retrieved from <https://www.ukpopulation.org/northern-ireland-population/> on 20th December 2018.

UK: Scotland: Demographic data refer to July 2018. Retrieved from <https://www.ukpopulation.org/scotland-population/> on 20th December 2018.

PARTICIPATION RATE

The 2018 SPACE questionnaire was sent to the Prison Administrations at the end of July 2018. The majority of them answered the questionnaire after the original deadline (30th September 2018), the last questionnaires were received during December 2018, and the last corrections were introduced in March 2019.

45 (86.5%) out of the 52 Prison Administrations in the 47 Council of Europe member states answered the SPACE I 2018 Questionnaire.

The following Prison Administrations did not respond to the questionnaire: Albania, Belgium, Bosnia & Herzegovina State level, Bosnia & Herzegovina Federal level, Hungary, Malta, and Ukraine. Turkey answered the questionnaire, but there were some inconsistencies in the data received that could not be solved in time. As a consequence, the country asked us to exclude the Turkish data from the SPACE I 2018 report. Turkey is however considered when estimating the participation rate.

For a few specific figures of some countries the data validation procedure revealed inconsistencies that cannot be explained. These figures are presented between brackets.

ACKNOWLEDGMENTS

The authors thank all persons who brought their support, advice, and suggestions throughout the elaboration of this report. First of all, we thank the national correspondents in each Member State of the CoE, without whom this report would not exist. We also thank the members of the PC-CP Working Group as well as Ilina Taneva and Christine Coleur at the CoE. Special thanks to Roy Walmsley and Jaime Rodriguez for their attentive and critical reading of the SPACE reports, and to Claude-Alain Barraud of the Geneva Cantonal Detention Office for the picture used in the cover.

DENMARK
<ol style="list-style-type: none"> 1. Changes in criminal law: <ol style="list-style-type: none"> a. Amendment of the Danish Penal Code (Act no. 672 of 8 June 2017 – acted in to force on 1. July 2017; b. Amendment to sections 38, 39 and 41 of the Danish Penal Code – the amendment of the law entails e.g. that parole of persons convicted under section 81 of the Criminal Code, who are not expelled by judgment, will require that the persons concerned have beforehand participated in a program established by the Prison and Probation Service with a view to preventing similar new crimes. The same applies in connection with parole of persons convicted of committing one of the crimes referred to in Chapter 12 or 13 of the Criminal Code, provided that the persons concerned have not been expelled by a judgment, and provided that special circumstances do not oppose the establishment of such a program. The amendment also implies that parole of inmates who have participated in a program established by the Prison and Probation Service in accordance with the abovementioned scheme is conditioned upon the continued participation by the persons concerned in the program during the probation period. 2. New legislation concerning certain categories of prisoners: <ol style="list-style-type: none"> a. 'Gang Package III' (spring 2017) - tighter regulations concerning possession of weapons, residence bans, etc.; b. Amendment of the Danish Alien Act, etc. (early 2017) – tighter control of foreigners on tolerated stay and expelled criminals, including the introduction of duty to report, harsher punishment, wearing an electronic tag while serving the sentence, special access to custody and amended right to complaint. 3. 4. **Individual pardons:** 0;
5. **Collective pardons:** 0;
6. **Other:** No.

GEORGIA

1. **Changes in criminal law:** In an effort to ensure equal apportionment of workload and in-depth review of the cases, as of 1 July 2017, the number of Local Councils increased from 5 to six councils. This amendment led to the improvement of the efficiency of the work carried out by the local councils. The decision to increase the number of local councils demonstrates that the state policy is focused on the improvement of the mechanism for early conditional release and development of individual terms and conditions for early conditional release;
2. **New legislation concerning certain categories of prisoners:** No;
3. **Amnesties:** 5;
4. **Individual pardons:** 548;
5. **Collective pardons:** 0;
6. **Other:** From the 1st January 2017 to the 31st January 2018 - Early Conditional Release - 1086 inmates; release due to the serious illness - 9 inmates.

4. **Individual pardons:** 0;
5. **Collective pardons:** 0;
6. **Other:** No.

GREECE

1. **Changes in criminal law:** Law 4489/2017, art. 43 (Government Gazette A, 140) extended until 28/8/2018 concerning the validity of the emergency measures for the decongestion of the Detention Facilities. These measures have affected the number of exits from penal institutions, since in most cases releases are mandatory upon completion of certain parts of prison sentences and are not conditioned upon decision by the judicial council;
2. **New legislation concerning certain categories of prisoners:** Law 4509/2017 (Government Gazette A, 201) "Measures for the treatment of persons who are exempt from the sentence due to mental or intellectual disorder and other provisions". The measures proposed by the above mentioned Law aim to ensure the treatment of those persons. The obsolete long-encapsulation in immune units is abolished and modern measures are put in place targeted to treatment, while at the same time the fundamental rights of the perpetrator as well as other persons are protected. In this context, the concept that faced the therapeutic detention only in the light of security, is enriched with modern scientific approaches for psychiatric care, as providing services of (mental) health and social reintegration. New legislation places emphasis on ensuring a quality level of hospitalization rather than the exclusive prison enforcement;
3. **Amnesties:** 0;
4. **Individual pardons:** 0;
5. **Collective pardons:** 0;
6. **Other:** No.

ICELAND
<ol style="list-style-type: none"> 1. Changes in criminal law: There were 3 laws with different amendments to Criminal law in 2017; 2. New legislation concerning certain categories of prisoners: No 3. Amnesties: 0; 4. Individual pardons: 4 inmates were pardoned; 5. Collective pardons: 0; 6. Other: Rules on service of a sentence in Vernd, a special home for prisoner changed on 28 March 2018: when a sentence is of one year or less, the time of residence in Vernd can be up to 3 months. When a sentence is of more than one year, a stay in the halfway house lengthens by 2.5 days for each month of the sentence, becoming 4 months with a two-year sentence of imprisonment. Then, the period of the stay lengthens in the same way, by one month for each sentenced year, and can become a maximum of 16 months (instead of 12 months before) when the sentence is 11 years.
IRELAND
<ol style="list-style-type: none"> 1. Changes in criminal law: No; 2. New legislation concerning certain categories of prisoners: <ol style="list-style-type: none"> a. The Minister for Children and Youth Affairs signed the necessary orders, with effect from the 31st March 2017, under the Children (Amendment) Act 2015, to end the practice of detaining 17-year-old boys in adult prison facilities. Since then, all children who have been sentenced to a period of detention by the courts are accommodated in Oberstown. b. Since October 2016, the Department of Children and Youth Affairs has been operating a pilot Bail Supervision Scheme. This Scheme operates from the Dublin Children's Court, and the pilot will last at least 2 years. c. The Bail Supervision Scheme provides a court with the option to grant bail to a child, rather than detaining the child, during remand proceedings. The option offered to the court would be to release the child on bail with conditions set by the court. 3. Amnesties: 0; 4. Individual pardons: 0; 5. Collective pardons: 0; 6. Other: No.
ITALY
<ol style="list-style-type: none"> 1. Changes in criminal law: The reason for the new increase in the number of prisoners in the period considered (+ 3,434 presents) is to be found in the progressive reduction of the effects of the temporary provision named "Special Early Release" (Law by Decree 23/12/2013, converted with amendments by Law 21/02/2014, n. 19). From the data available, indeed, it results that the decreasing effect on the prison population due to the said law involved, during the year 2017, 2,791 inmates, while in the previous years it involved respectively 6,212 (2014); 7,141 (2015); 4,877 (2016) inmates. The relevant trend is downwards, since in the period between 1/01/2018 and 30/09/2018 there were only 1,237 cases of special early release. 2. Statistical Tables

Section 1: Stock indicators on 31st January 2018

PART A: CHARACTERISTICS OF INMATES ON 31ST JANUARY 2018

This section includes information on the characteristics of inmates on 31st January 2018 in each member state of the CoE that answered the SPACE I 2018 questionnaire.

Standard definitions used in Part A

- **Total number of inmates (including pre-trial detainees):** The total number of inmates (including pre-trial detainees), also known as *prison stock*, corresponds to the total number of persons effectively placed in prison. Information on the categories of inmates included by each country can be found in Table 2.1 and 2.2.
- **Prison population rate³ per 100,000 inhabitants:** This indicator corresponds to the ratio of the number of inmates (including pre-trial detainees) per 100,000 inhabitants in each country, as of 31st January 2018. Taking into account that the information on the populations of the countries is available on 1st January of each year, the figures used for the calculations are respectively on 1st January 2018 for the total population of the countries and 31st January 2018 for the prison population.
- **Adjusted number of inmates and adjusted prison population rate:** The number of inmates and the prison population rates are adjusted according to the information provided in tables 2.1 and 2.2. The adjustment consists in *excluding* –whenever possible– all the categories of Tables 2.1 and 2.2 from the total number of inmates, and recalculating the rate of *inmates held in penal institutions* per 100,000 inhabitants. The adjusted figures are comparable estimates; nevertheless, these figures *should not* be considered as official national data.
- **Age of criminal responsibility:** Starting from this age, minors are considered as old enough to be recognised as responsible for criminal offences perpetrated and to be tried by a court for children.
- **Minimal age for the use of custodial sanctions and measures:** Starting from this age, it is possible to sentence a minor to detention or to education measures in closed penal institutions.
- **Age of criminal majority:** Starting from this age the persons should be tried as adults and lose the status of minors and the special conditions applied to it.
- **Pre-trial detainees / Pre-trial detention:** See *Remand in custody*.
- **Remand in custody:** In Recommendation Rec (2006) 13, the Council of Europe adopts a large definition that includes any period of detention prior to the final conviction of a suspected offender.
- **Detainees not serving a final sentence:** Detainees placed on *remand in custody*. According to the Council of Europe’s definition of remand in custody (see above) this category should include (a) untried detainees, (b) detainees found guilty but who have not received a final sentence yet, (c) detainees who have not received a final sentence yet, but who have started serving a prison sentence in advance, and (d) sentenced inmates who have appealed or who are within the statutory limit to do so. However, categories (b) and (c) do not exist in all countries, and some countries do not include category (d) under the total number of detainees not serving a final sentence.
- **Dangerous offenders:** According to Recommendation CM/Rec (2014) 3 of the Council of Europe, (Strasbourg, 19 February 2014)⁴, a *dangerous offender is a person who has been convicted of a very serious sexual or very serious violent crime against persons and who presents a high likelihood of re-*

³ This indicator is sometimes referred to as *detention rate*, or *prisoner rate*, or *imprisonment rate*, but these terms are ambiguous. Therefore, the Council of Europe has adopted the term *prison population rate*.

⁴ Available at http://www.coe.int/t/dghl/standardsetting/cdpc/PC-GR-DD/Recomm%202014_3_E_final.pdf.

offending with further very serious sexual or very serious violent crimes against persons. Each Member State has its own legislation concerning the special requirements and conditions for institutional placement/imprisonment of this category of offenders.

Notes – Tables 2.1, 2.2, 3 & 4

General note to Table 4: Data for the total number of inmates as well as for the population of the country has been revised and updated for all countries and for the entire series. Thus, some figures may not correspond to the ones provided by previous SPACE I reports from 2008 to 2016. The new series from 2005 to 2015 are available in the study *Prisons in Europe 2005-2015* available on the SPACE website (www.unil.ch/space).

ANDORRA

- **Table 4:** The reference date for 2014 to 2018 is the 1st July, from <https://population.un.org/wpp/DataQuery/>.

ARMENIA

- **The reference date is the 1st January 2018 instead of the 31st January 2018.**
- **Table 4:** The reference date for 2014 is the 1st July, from <https://population.un.org/wpp/DataQuery/>.

AUSTRIA

- **Tables 2.1 and 2.2:**
 - In Austria there is only one penal institution for juvenile offenders. As this institution is located in Lower Austria, not all Austrian juvenile offenders serve their sentences there. Therefore, there are specialized departments for young offenders established in other Austrian penal institutions.
 - The type of electronic monitoring used in Austria is the electronically monitored home detention with the use of electronic bracelet.

AZERBAIJAN

- **Table 4.:**
 - The reference date for 2018 is the 1st July, from <https://population.un.org/wpp/DataQuery/>.
 - The Prison Population Rates for Azerbaijan are recalculated for 2010 and 2011 including only inmates managed by the Prison Service and the pre-trial detention facility under the Ministry of National Security.

BOSNIA AND HERZEGOVINA – REPUBLIKA SRPSKA

- **Table 4:** The reference date for 2014 to 2018 are mid-year estimates, from <http://www2.rzs.rs.ba>.

BULGARIA

- **Table 4.:** The Prison Population Rates for Bulgaria are recalculated for 2008-2013, by *excluding* the inmates held in the investigative detention facilities [IDF], because the accurate number of these inmates is missing since 2013. The evolution should be considered as partial as the real number of the total prison population is not available.

CROATIA

- **The reference date is the 31st December 2017 instead of the 31st January 2018.**

CYPRUS

- Among the total number of inmates are 621 persons held in prison and 22 held in police stations.
- Offenders are considered juvenile offenders until 21 years old.

CZECH REPUBLIC

- **The reference date is the 31st December 2017 instead of the 31st January 2018.**
- **Tables 2.1 and 2.2:**
 - There are units for juvenile offenders in the following prisons: Heřmanice, Pardubice, Všehrady and Světlá nad Sázavou (female). These units report 68 sentenced persons (juveniles and young adults) as for 31 December 2017.
 - Forensic detention facilities are public (not private) institutions run by the Czech Prison Service. We have two forensic detention facilities, one at Brno Remand Prison and one at Opava Prison

ESTONIA

- **The reference date is the 1st January 2018 instead of the 31st January 2018.**
- **Tables 2.1 and 2.2:**
 - In Estonia there are educational institutions for juveniles with bad behaviour, but those institutions are not part of the Prison Administration. These special schools are educational institutions and managed by the Ministry of Education and Research. The court may take decision to send a juvenile offender to special school, but this is not a substitution of imprisonment.
 - Psychiatric institutions outside penal institution are managed by the Ministry of Social Affairs. The court orders coercive psychiatric treatment of the person. During this time, when person is in day care coercive psychiatric in-patient treatment outside penal institution he/she isn't an inmate or probationer.

- Asylum seekers or illegal aliens are held in closed institution which is managed by Police and Border Guard Board (Ministry of the Interior).
- Electronic surveillance is determined by the court and person under electronic monitoring is probationer in our system.

FINLAND

- **Tables 2.1 and 2.2.:** There are 199 persons under electronic monitoring and 4 persons in private facilities, however, these 203 persons are not included in the total number of inmates.

FRANCE

- **The reference date is the 2nd February 2018 instead of the 31st January 2018.**
- The total number of inmates include 1693 persons in parole and 339 persons in outside placements.

GEORGIA

- **Tables 2.1 and 2.2:** The type of surveillance applied to persons under electronic monitoring is electronic bracelet.

GERMANY

- **The reference date is the 31st March 2017 instead of the 31st January 2018.** More recent data is although available: On 30th November there were 64 351 inmates, of which:
 - 5 169 persons held in custodial institutions/units for juvenile offenders;
 - 129 asylum seekers or illegal aliens held for administrative reasons;
 - 547 persons under security measures/preventive detention for dangerous offenders.
- **Table 2.1:** Youth custody and remand detention for juveniles must be executed in juvenile penal institutions or in separate prison wings for juveniles. Juvenile offenders must follow a mainly educational regime.

GREECE

- **Table 2.1:**
 - Persons held in custodial institutions/units for juvenile offenders are aged up to 18 years old (on previous years, juveniles until 21 years old were included).
 - Concerning electronic monitoring, it is used (1) instead of remand detention for persons who have not been sentenced yet (home detention with electronic monitoring - bracelet), (2) for imprisoned offenders who may be released earlier spending the time until the release date under home detention with electronic monitoring (bracelet) and (3) for imprisoned remand detainees or sentenced offenders who are granted educational leaves in order to attend tertiary education under electronic surveillance (bracelet). Categories (1) and (2) are not included in the total number of inmates.
- **Table 2.2:**
 - Persons held as not criminally responsible by the court are detained in Psychiatric Institutions belonging to the Ministry of Health and therefore are not included in the total number of inmates. Persons held as partly criminally responsible may be sentenced by the court (to a reduced sentence) and additionally be ordered to be detained in a psychiatric prison department run by the Ministry of Justice (articles 36, 37, 70A and 83 Criminal Code). There are no specific measures for "dangerous offenders" as defined in the Recommendation CM/Rec (2014) 3.

ITALY

- **Table 2.1 and 2.2:** People undergoing security measures as provided for by Italian legislation are called "internees".

LATVIA

- **The reference date is the 1st January 2018 instead of the 31st January 2018.**
- **Tables 2.1 and 2.2:** Persons under electronic monitoring are not included in the total number of inmates, because they are counted as probation clients. Electronic monitoring in Latvia can be applied as early conditional release from prison (earlier than conditional release without electronic monitoring).

LIECHTENSTEIN

- The country of Liechtenstein is in contract with two countries:
 - Austria (since 25.08.1983) to bring sentenced Persons or Persons with longer sentences to other Prisons with the possibility of the right treatment in every case.
 - Switzerland (since the 1st January), more precisely the canton of Saint Gallen for short sentences

LITHUANIA

- **The reference date is the 1st January 2018 instead of the 31st January 2018.**
- **Tables 2.1 and 2.2:** Electronic monitoring is applied only to sentenced offenders under the supervision of probation, i.e., conditionally released from correctional establishments, and electronic monitoring is applied to offenders upon whom a curfew is imposed. Bracelets are used for electronic monitoring

LUXEMBOURG

- The reference date is the 1st January 2018 instead of the 31st January 2018.

MOLDOVA

- The total number of inmates include 70 juvenile offenders.

MONACO

- **Table 4:** The reference date for the all series is the 1st July, from <https://population.un.org/wpp/DataQuery/>.

MONTENEGRO

- On 31st January 2018 there were 313 detainees and 828 prisoners.

NETHERLANDS

- Data refers to adults only.
- See Table 1.
- **Tables 2, 2.1 and 2.2.:**
 - In total 460 juvenile offenders held in facilities for juvenile offenders (of whom 330 are 18 years or older), are NOT included in the total number of inmates.
 - In total 1310 people in custodial clinics (TBS) placed there under a hospital order are NOT included in the total number of inmates.
 - 1534 illegal aliens are held for administrative reasons and are NOT included in the total number of inmates.
- **Table 4.:** The Prison Population Rates for the Netherlands have been fully recalculated for the whole series on the basis of the figures provided since 2012 (i.e. only adult inmates).

POLAND

- The reference date is the 31st December 2017 instead of the 31st January 2018.

PORTUGAL

- The reference date is the 1st January 2018 instead of the 31st January 2018.
- **Table 2.1 and 2.2:** Dangerous offenders declared criminally irresponsible by the court are placed in psychiatric institutions or in penitentiary hospitals (138) and in psychiatric institutions or non-penitentiary hospitals (137).

RUSSIAN FEDERATION

- **Table 4:** The reference date for 2014 to 2018 is the 1st July, from <https://population.un.org/wpp/DataQuery/>.

SAN MARINO

- **Table 4:** The reference date for 2016 to 2018 is the 1st July, from <https://population.un.org/wpp/DataQuery/>.

SERBIA (REPUBLIC OF)

- The reference date is the 31st December 2017 instead of the 31st January 2018.
- The total number of inmates include 42 persons who are under special measures after serving the prison sentence for offences against sexual freedom of minors.

SLOVAK REPUBLIC

- **Tables 2.1 and 2.2.:**
 - Dangerous offenders: Persons considered as dangerous for the community because of their mental disorder (following a medical evaluation) are placed in detention in psychiatric hospitals since 2006. These persons are under the responsibility of the ministry of health, prison services only ensure the security of the building.
 - Electronic monitoring is used, since the 1st January 2016 as a technical mean to control inmates to whom home confinement or other restrictions have been applied. In the Slovak Republic, the sentence of home confinement is not performed as a part of the prison sentence.

SPAIN

- **Tables 2.1 and 2.2:** Dangerous offenders considered as totally or partially criminally responsible by the court only refer to prisoners under custodial security measures dependent on the General State Administration.

SWEDEN

- The reference date is the 1st October 2017 instead of the 31st January 2018.
- Figures do not include inmates in remand prisons who are detained for other reasons than suspicion of crime, for example inmates taken in custody awaiting deportation.
- **Table 2.1 and 2.2:** The total number of inmates include the following categories (although data is not available):
 - Persons held in units for juvenile offenders. This refers to persons held in places intended for juveniles in penal institutions.
 - Persons held in institutions for drug-addicted offenders outside penal institutions;

-
- Persons with psychiatric disorders held in psychiatric institutions or hospitals outside penal institutions;
 - Persons under security measures / preventive detention for dangerous offenders.

SWITZERLAND

- The reference date is the 6th September 2017 instead of the 31st January 2018.

UK: ENGLAND & WALES

- The reference date is the 31st December 2017 instead of the 31st January 2018.
- **Tables 2.1 and 2.2.:** all data are available at <https://www.gov.uk/government/statistics/offender-management-statistics-quarterly-july-to-september-2017>.
- **Table 4:** The figure concerning the population of the country was calculated by the authors (UK's population – (Northern Ireland's population + Scotland's population) and refer to the 1st July.

UK: NORTHERN IRELAND

- **Table 2.1 and 2.2** There is a secure custody center for juveniles in Northern Ireland, which is both a custodial and an educational institution, and where 27 children are held.
- **Table 4:** The reference date concerning the population of the country for 2018 is the 1st July, from <https://population.un.org/wpp/DataQuery/>.

UK: SCOTLAND

- **Table 4:** The reference date concerning the population of the country for 2018 is the 1st July, from <https://population.un.org/wpp/DataQuery/>.
-

Notes – Tables 5 & 6

CROATIA

- The reference date is the 31st December 2017 instead of the 31st January 2018.

CYPRUS

- Median and average only refer to inmates held in prison institutions.

GERMANY

- **Table 6:** Additional information - On 31st March 2017, there were 7 398 prisoners and detainees under 25 years old, 26 688 aged from 25 to 40 years old and 17 557 aged 40 years old and over. There were (on the same date), 437 detainees aged from 14 to 18 years, old, 1 185 from 18 to 21, and 12 243 aged 21 years old and over.

GREECE

- **Table 5:** According to laws 3860/2010, 4322/2015 and 4356/2015, the minimum age of criminal responsibility in Greece has been raised from 13 to 15 years old. The minimum age for the application of detention (custody) in a special facility for minors is 15 years old. The juvenile court may impose detention to a child offender in a special facility for minors (custody) in very exceptional cases, like in cases of murder and rape (when the victim is under 15 years old). The educational measure of placement in a Reformatory Institution for Minors may be imposed only for punishable acts which, if committed by adults, would be felonies.

IRELAND

- **Table 5:** Under section 52 of the Children Act 2001, a child under 12 years of age shall not be charged with an offence. An exception to this is that a child aged 10 or 11 years may be charged with murder, manslaughter, rape, rape under section 4 of the Criminal Law (Rape) (Amendment) Act 1990 or aggravated sexual assault.
- **Table 6:** The average age for juvenile detention centers is 16.93 and the median is 17.17.

LATVIA

- **Table 6:** It is not possible to calculate the average and the median because age is recorded according to different categories. There are 10 inmates up to 18 years old, 68 aged from 18 to less than 21 years old, 222 from 21 to less than 25 years, old, 455 from 25 to less than 30 years old, 977 ifrom 30 to less than 40 years old, 590 from 40 to less than 50 years old, 278 from 50 to less than 60 years old, and 114 of 60 years old and over.

LITHUANIA

- The reference date is the 1st January 2018 instead of the 31st January 2018.

LUXEMBOURG

- The reference date is the 1st January 2018 instead of the 31st January 2018.

POLAND

- The reference date is the 31st December 2017 instead of the 31st January 2018.

PORTUGAL

- The reference date is the 1st January 2017 instead of the 31st January 2018.

SERBIA (REPUBLIC OF)

- The reference date is the 31st December 2017 instead of the 31st January 2018.

SLOVAK REPUBLIC

- **Table 5:** According to the Penal Code, if a natural person who at the time of committing the criminal offence, has not reached 14 years old, she is considered not criminally responsible, unless in cases of sexual abuse. In such cases, a person is considered not criminally responsible if at the time of committing such offence he/she has not reached 15 years old (if it is considered that this person had not the intellectual and moral maturity to recognize the illegality of his/ her act or to control his/her actions). A person is considered a juvenile offender if at the time of his/ her act has between 14 and 18 years old. Prison sentences are, for juveniles, reduced by half. The mitigating circumstance which is taken into account when determining the type and the length of the sentence (if the ratio of mitigating circumstances prevails, the upper limit of the statutory sentence is reduced by one third) is also the fact that the offender committed a criminal offense between 18 and 21 years old.

SWEDEN

- The reference date is the 1st October 2017 instead of the 31st January 2018.

UK: ENGLAND & WALES

- The reference date is the 31st December 2017 instead of the 31st January 2018.

UK: SCOTLAND

- The reference date is the 2nd February 2018 instead of the 31st January 2018.
- **Table 6:** Median and average ages are not available, however, there are 285 inmates aged from 16 to 20 years old and 6 727 aged of 21 years old and over. There is no age breakdown for recalled life prisoners (112), convicted awaiting sentence (276), civil prisoners (0) or prisoners awaiting deportation (7).

⁹ Data concerning the number of foreign males does not include non-sentenced prisoners. Therefore, the calculation of the percentage of foreign male inmates is based on the total number of sentenced male inmates instead of the total number of male inmates.

¹⁰ Data concerning the number of foreign females does not include non-sentenced prisoners. Therefore, the calculation of the percentage of foreign female inmates is based on the total number of sentenced female inmates instead of the total number of female inmates.

Notes – Table 7

ARMENIA

- The reference date is the 1st January 2018 instead of the 31st January 2018.
- There are 2 juvenile inmates among the total number of detainees not serving a final sentence (1 258).

CROATIA

- The reference date is the 31st December 2017 instead of the 31st January 2018.

CZECH REPUBLIC

- The reference date is the 31st December 2017 instead of the 31st January 2018.
- There are 4 juvenile inmates among the 1 727 foreign males
- There are 4 foreigners among the 44 juvenile male offenders.
- Among the total number of minors (46), there are 36 juveniles not serving a final sentence placed in institutions/units for juvenile offenders, 3 sentenced juveniles in Plzeň Prison and 7 pre-trial detainees.

GEORGIA

- The reference date is the 31st January 2018 instead of the 31st January 2018.

GERMANY

- Additional information: Figures on 30th November 2018: 60 633 male inmates (of which 13 227 detainees not serving a final sentence), and 3 719 female inmates (of which 736 detainees not serving a final sentence).

LATVIA

- The reference date is the 1st January 2018 instead of the 31st January 2018.

LUXEMBOURG

- The reference date is the 1st January 2018 instead of the 31st January 2018.

MOLDOVA

- There are 69 juvenile male inmates and 1 juvenile female.

POLAND

- The reference date is the 31st December 2017 instead of the 31st January 2018.

PORTUGAL

- The reference date is the 1st January 2018 instead of the 31st January 2018.

RUSSIAN FEDERATION

- Non-validated figures are presented between brackets.
- It is not possible to separate male, female and other gender for minors. The total number of minors is 2 296.

SERBIA (REPUBLIC OF)

- The reference date is the 31st December 2017 instead of the 31st January 2018.

SWEDEN

- The reference date is the 1st October 2017 instead of the 31st January 2018.
- Figures do not include inmates in remand prisons who are detained for other reasons than suspicion of crime, for example inmates taken in custody awaiting deportation.
- Citizenship is not available for detainees not serving a final sentence. Figures concerning foreign inmates (males and females) refer only to sentenced prisoners. As a consequence:
 - The calculation of the percentage of **foreign male inmates** is based on the total number of sentenced male inmates (calculated by the authors – 3 898) instead of the total number of male inmates.
 - The calculation of the percentage of **foreign female inmates** is based on the total number of sentenced female inmates (calculated by the authors – 250) instead of the total number of female inmates.
- Age is not available for detainees not serving a final sentence.

SWITZERLAND

- The reference date is the 6th September 2017 instead of the 31st January 2018.
- It is not possible to differentiate foreign inmates according to their gender.

UK: ENGLAND & WALES

- The reference date is the 31st December 2017 instead of the 31st January 2018.
- Data is available at <https://www.gov.uk/government/statistics/offender-management-statistics-quarterly-july-to-september-2017>.

UK: SCOTLAND

- The reference date is the 2nd February 2018 instead of the 31st January 2018.
 - Non-sentenced only includes untried prisoners. Gender breakdown is not available for convicted awaiting sentence. Furthermore, data relates to 2nd February 2018 instead of 31st January 2018, thus the sum of sentenced and non-sentenced inmates does not match the total number of inmates.
-

Notes – Tables 8, 9, 10 & 11

General note to Tables 8, 9 & 11: Merged categories are not taken into account in the calculation of average and median values.

ARMENIA

- **The reference date is the 1st January 2018 instead of the 31st January 2018.**
- **Table 9.:** The categories of offences in the Armenian penal code are different from the ones proposed by SPACE:
 - crimes against life and health (579 inmates);
 - crimes against freedom and dignity (39 inmates);
 - sexual offences (48 inmates);
 - crimes against family and child interest (2 inmates);
 - crimes against property (990 inmates);
 - economic crimes (29 inmates);
 - crimes against public safety (70 inmates);
 - crimes against public order and morality (36 inmates)
 - crimes against public health (349 inmates);
 - crimes against state safety and constitutional order (12 inmates);
 - crimes against state service (11 inmates);
 - crimes against governmental order (38 inmates);
 - crimes against justice (4 inmates);
 - crimes against military (32 inmates).
- **Table 10.:** Some of the categories concerning the length of the sentence used in the country are different from those proposed in the SPACE questionnaire:
 - The categories ranging from less than 1 month to less than 1 year, cannot be separately presented. There were 38 inmates whose sentence is less than 1 year;
 - The category “from 10 to less than 20” refers to inmates serving sentenced ranging from 10 to less than 15 years (instead of 20 years);
 - The category “20 years and over” refers to inmates serving sentences above 15 years (instead of 20).

AUSTRIA

- **Table 9: Different categories of offences are used in the Austrian legal system.**
 - Offences against freedom (i.e. Human trafficking, kidnapping, threat): 773 sentenced prisoners and 92 detainees not serving a final sentence;
 - Offences against sexual integrity and self-determination (i.e. rape and other sexual offences): 589 sentenced prisoners and 11 detainees not serving a final sentence;
 - Offences against property (i.e. theft, robbery): 2 682 sentenced prisoners and 875 detainees not serving a final sentence;
 - Offences against body and life (i.e. Homicide, assault and battery): 1 163 sentenced prisoners and 875 detainees not serving a final sentence;
 - Drug offences: 1 331 sentenced prisoners and 608 detainees not serving a final sentence;
 - Other offences: 365 sentenced prisoners and 98 detainees not serving a final sentence.

AZERBAIJAN

- **Table 9:**
 - Assault and battery: assault leading to aggravated bodily injury;
 - Rape & Other type of sexual offences: these categories cannot be separately presented;
 - Theft: Robbery followed by force or threat of force.
- **Table 10:** The categories used in the country do not match the ones proposed by SPACE:
 - Less than 2 years (2 467 inmates);
 - From 2 years to less than 7 years (9 148);
 - From 7 years to less than 12 years (5 791 inmates);
 - 12 years and over (2 127).

BULGARIA

- **Tables 9, 10 & 11:** Non-validated figures are presented between brackets.

CROATIA

- **The reference date is the 31st December 2017 instead of the 31st January 2018.**
- The data include 53 juvenile offenders under educational measures in correctional institutions;
- The data include 10 juvenile offenders held in juvenile prison;

- There are 76 inmates who are misdemeanor punished prisoners that are neither considered as sentenced, nor as non-sentenced inmates, therefore, they are not included in the total number of sentenced /non-sentenced inmates;
- **Tables 10 & 11:** The category *other* refers to juveniles under educational measures in correctional institutions. The measure ranges from 6 months to a maximum of 3 years.

DENMARK

- **Table 8:**
 - There are no separate figures for variables 8E and 8G. therefore, the figure 242 refer to both categories;
 - 132 of the 1 478 detainees not serving a final sentence are imprisoned according to the alien law.
- **Tables 10 & 11:** The category *other* refers to inmates sentenced to an unlimited sentence according to the Greenland criminal law (security measures).

FINLAND

- **Table 9:**
 - There are no separate figures available for variables 9E and 9H. Therefore, the figure includes all sexual offences.
- **Table 10:** The category *other* refers to 80 fine defaulters.

FRANCE

- **Table 9:** The total number of sentenced inmates does not correspond to the sum of the subcategories concerning the type of offences for which prisoners were sentenced for because data are issued from two different sources;
- **Tables 10 & 11:** The total number of sentenced inmates does not correspond to the sum of the subcategories concerning the length of the sentence because data are issued from two different sources;

GEORGIA

- **Tables 10 & 11:** The principal offence rule does not apply, thus, the total number of sentenced inmates does not correspond to the sum of the different categories concerning the type of offences for which prisoners were sentenced for.

GERMANY

- **The reference date is the 31st March 2017 instead of the 31st January 2018.**
- **Table 9:** “Robbery” includes all cases of persons convicted of unlawful appropriation. On the other hand, “theft”, refers to situations when a perpetrator unlawfully appropriates for himself chattels that were already in his possession or at least not in the damaged person’s possession.
- **Tables 10 & 11:**
 - Discrepancies concerning the total number of sentenced prisoners and the sum of prisoners according to the length of their sentences is due to some figures that are not available.
 - Additional information: on 31st March 2017 there were 10 339 persons with sentences of more than 1 up to 2 years, 11 541 persons with sentences of more than 2 up to 5 years, and 489 persons with sentences of more than 10 up to 15 years.

GREECE

- Detainees not serving a final sentence in Greece are defined as inmates who have not been tried yet. Once a decision is reached on the first degree they are regarded as sentenced inmates, even if there is no final sentence or they are still within the statutory limit to appeal;
- **Table 10:** The category *other* refers to 21 foreigners who carried out their sentence and are about to be expelled or sent to their country (extradition), as well as 17 debtors, that are neither considered sentenced prisoners nor non-sentenced inmates.

ITALY

- The number referring to final sentenced prisoners does not include inmates under security measures. Nevertheless, for informational purposes, there were 313 inmates under security measures.

LATVIA

- **The reference date is the 1st January 2018 instead of the 31st January 2018.**
- The principal offence rule does not apply (person can have more than one prison sentence).
- In Latvia the death penalty is not applicable to crimes committed during peace time, but the Latvian Criminal Law provides for the possibility of applying a death sentence for crimes committed during the war.
- **Table 8:** Additional information is available:
 - Persons whose criminal proceedings are in pre-trial investigation - 244;

- Persons whose criminal proceedings have been completed and the case has been referred to the Court of First Instance - 238;
- Persons awaiting examination of the judgment in order of appeal - 222;
- Persons awaiting the adjudication of the judgment - 43;
- Persons awaiting the entry into the force of the judgment - 196;
- Persons placed in accordance with Article 16 of the Latvian Penal Code (temporary placement of sentenced persons in investigation prison) and in accordance with Article 20 (transfer of sentenced persons to the investigation prison) - 11;
- Sentenced persons who are to be transferred to the detention facilities - 93;
- Persons to be issued abroad - 3;
- -Persons on transit convoys - 1.

LIECHTENSTEIN

- **Table 9:**
 - If the total number of inmates is considered (sentenced and non-sentenced inmates), there are 1 inmate sentenced for homicide (which has been sent to Switzerland according to the agreements Liechtenstein has with this country), 3 for economic and financial offenses, and 8 for other offences;
 - The category *other* refers to burglary.

LITHUANIA

- The reference date is the 1st January 2018 instead of the 31st January 2018.
- **Table 8:**
 - According to the Code of Criminal Procedure, offenders upon their written request may start serving a sentence until the appeal proceedings. Therefore those who have filed an appeal (variable 8C) and have the status of pre-trial detainees in provided statistical data are included in the total number of sentenced offenders with a final decision serving a sentence of imprisonment;
 - There are 254 pre-trial detainees whose cases are at the pre-trial investigation phase (cases are not yet forwarded to court).

LUXEMBOURG

- The reference date is the 1st January 2018 instead of the 31st January 2018.
- **Table 8:** There are 2 minors that are not included on the classification according to the legal status.

MOLDOVA

- The principal offence rule does not apply.

MONACO

- The principal offence rule does not apply.

MONTENEGRO

- The total number of sentenced prisoners (828) includes 57 prisoners who are sentenced to both prison and security measure.
- **Tables 10 & 11:** Among the 57 inmates sentenced to both prison and security measures, 6 are serving sentences up to six months, 43 up to three years, and 8 more than three years.

NETHERLANDS

- There are 276 inmates whom cannot be classified neither as sentenced nor as non-sentenced, either because the legal status is missing (210), or because they have other legal status (e.x: imprisonment to force someone to pay money that can be seen as equivalent to the profit that has resulted from criminal activity).
- **Table 9:**
 - There are no separate figures available for variables 9E and 9H. Therefore, the figures include all sexual offences;
 - Other offences include other laws and unknown. For some inmates, the type of crime is not registered within the prison service. For instance in the case of people who are convicted to pay financial compensation to one or more victims and who are detained for not having done that.
- **Table 10:** “Other” refer sentences of unknown duration (129 prisoners).

NORTH MACEDONIA

- **Tables 10 & 11:**
 - There are prisoners who have more than one sentence to serve. The length of their sentence is thus the sum of the length of all individual sentences.
 - The category “other” refer to persons under the institutional measure “referee in a house of correction,”. This measure runs from 1 to 5 years, however, the court do not determinate in advance

the length of this measure. The court decide additional on the base of the results of the educational process.

NORWAY

- In addition to figures concerning sentenced and non-sentenced inmates, there are 83 fine defaulters.
- **Table 10 & 11:** The classification of prisoners according to length of sentence is a based on “calculated estimation”. This estimation cannot be generate for a specific date, and are therefore referent to the day when the estimation was run.

POLAND

- **The reference date is the 31st December 2017 instead of the 31st January 2018.**
- There are 446 inmates (who have not paid their fine and were eventually sent to prison) that are neither considered as sentenced prisoners nor as detainees not serving a final sentence.
- **Tables 10 & 11:** there are different categories in the Polish legal system:
 - Less than 3 months – 736 prisoners;
 - From 3 months to less than 6 months - 4 030 prisoners;
 - From 6 months to less than 1 year - 10 723 prisoners;
 - From 1 year to less than 3 years - 25 297 prisoners;
 - From 3 years to less than 5 years - 9 585 prisoners;
 - from 5 years to less than 10 years - 6 113 prisoners;
 - From 10 years to 20 years - 2 462 prisoners;
 - 25 years - 1 733 prisoners;
 - Life imprisonment - 397 prisoners;
 - Security measures – NA;
 - Death sentence – NAP;
 - 4 246 prisoners are serving alternative penalties and 8 15 are serving other isolation measures.

PORTUGAL

- **The reference date is the 1st January 2017 instead of the 31st January 2018.**

ROMANIA

- **Table 9:** Data relates to both sentenced and non-sentenced inmates.

RUSSIAN FEDERATION

- **Table 9:** There are no separate figures available for variables 9E and 9H. Therefore, the figure includes all sexual offences.

SERBIA (REPUBLIC OF)

- **The reference date is the 31st December 2017 instead of the 31st January 2018.**
- There are 3 types of security measures in the System for Enforcement of Penal Sanctions of the Republic of Serbia:
 - Mandatory psychiatric treatment and keeping in a medical institution - 324;
 - Mandatory treatment of drug addicts -121;
 - Mandatory treatment of alcoholics -104.
- In the total number of sentenced and non-sentenced inmates are not included: persons under security measures, persons under educational measures (192), persons convicted for misdemeanor (349), and incarcerated juveniles (20).

SLOVAK REPUBLIC

- **Tables 10 & 11:**
 - Variables 10I & 11I: Refer to prisoners whose sentence goes from 10 to less than 15 years (instead of 10 to less than 20 years);
 - Variables 10J & 11J: Refer to prisoners whose sentence goes from 15 to less than 25 years (instead of 20 years and over).

SWEDEN

- **The reference date is the 1st October 2017 instead of the 31st January 2018.**
- **Tables 10 & 11:** Sentenced prisoners under security measures are included in the specific lengths of the sentences.

SWITZERLAND

- The reference date is the 6th October 2017 instead of the 31st January 2018.
- **Table 8:** The total number of non-sentenced inmates only include detainees who have not received a final sentence yet, but who have started serving a prison sentence in advance and untried detainees.
- **Tables 10 & 11:** “Other” includes inmates under alternative custodial sentences.

UK: ENGLAND & WALES

- The reference date is the 31st December 2017 instead of the 31st January 2018.

UK: SCOTLAND

- The reference date is the 2nd February 2018 instead of the 31st January 2018. As the total number of inmates relates to the 31st January, the sum of the different categories does not match the figure for the total number of inmates. on 2nd February 2018 there were 7 407 inmates.
- **Table 9: different categories are available:**
 - Less than 1 month – 54 prisoners;
 - From 1 to less than 2 months – 13 prisoners;
 - From 2 to less than 3 months – 37 prisoners;
 - From 3 to less than 4 months - 91 prisoners;
 - From 4 to less than 5 months – 81 prisoners;
 - From 5 to less than 6 months – 192 prisoners;
 - From 6 to less than 12 months – 513 prisoners;
 - From 1 to less than 2 years - 920 prisoners;
 - From 2 to less than 4 years – 1 206 prisoners;
 - From 4 to less than 10 years – 1 543 prisoners;
 - Over 10 years – 288 prisoners;
 - Life imprisonment – 1 081 prisoners.

¹¹ The percentage of foreign inmates is calculated on the basis of the total number of sentenced prisoner (instead of the total number of inmates) because data about inmates' nationality is not available for detainees not serving a final sentence, and thus only concern sentenced prisoners.

Notes – Tables 12 & 13

ANDORRA

- Inmates with unknown nationality/ other considered foreign inmates, and are, thus, *included* in the total number of foreign inmates.

AUSTRIA

- Inmates with unknown nationality/ other considered foreign inmates, and are, thus, *included* in the total number of foreign inmates.

CROATIA

- **The reference date is the 31st December 2017 instead of the 31st January 2018.**
- Inmates with unknown nationality/ other considered foreign inmates, and are, thus, *included* in the total number of foreign inmates.
- **Table 12:**
 - The total number of national sentenced prisoners includes 74 misdemeanor prisoners;
 - The total number of foreign sentenced prisoners includes 2 misdemeanor prisoners.

CZECH REPUBLIC

- Inmates with unknown nationality/ other considered foreign inmates, and are, thus, *included* in the total number of foreign inmates.
- **Table 12:**
 - The total number of national sentenced prisoners includes 76 persons placed in forensic detention facilities;
 - The total number of foreign sentenced prisoners includes 4 juvenile offenders placed in units for juvenile offenders as well as 3 foreign nationals placed in forensic detention facilities.

DENMARK

- Inmates with unknown nationality/ other considered foreign inmates, and are, thus, *included* in the total number of foreign inmates.

ESTONIA

- There is no information considering the number of foreign inmates with legal resident status, because the information is gathered by the Ministry of Interior, not by Prison Administrations.

FINLAND

- Inmates with unknown nationality/ other considered foreign inmates, and are, thus, *included* in the total number of foreign inmates.

FRANCE

- Information concerning the legal status of national inmates is missing for 2 161 inmates.
- Information concerning the legal status of foreign inmates is missing for 521 inmates.

GERMANY

- **The reference date is the 31st March 2017 instead of the 31st January 2018.**
- Inmates with unknown nationality/ other considered foreign inmates, and are, thus, *included* in the total number of foreign inmates.

GREECE

- Inmates with unknown nationality/ other considered foreign inmates, and are, thus, *included* in the total number of foreign inmates.

ICELAND

- Inmates with unknown nationality/ other considered foreign inmates, and are, thus, *included* in the total number of foreign inmates.

IRELAND

- The category “other” refer to foreign inmates concerned by a deportation/immigration order, that can neither be considered as sentenced, nor as non-sentenced inmates. These 11 foreign inmates included in this category are part of the total number of foreign inmates.

ITALY

- Inmates with unknown nationality/ other considered foreign inmates, and are, thus, *included* in the total number of foreign inmates.
- **Table 12:** There are 259 internees that can neither be considered as sentenced prisoners, nor as detainees not serving a final sentence.

LATVIA

- **Tables 12 & 13:** According to Latvian legislation, it is not mandatory for a person to reveal nationality, thus, such information is not collected.

LITHUANIA

- **The reference date is the 1st January 2018 instead of the 31st January 2018.**
- Inmates with unknown nationality/ other considered foreign inmates, and are, thus, *included* in the total number of foreign inmates.

LUXEMBOURG

- **The reference date is the 1st January 2018 instead of the 31st January 2018.**
- Inmates with unknown nationality/ other considered foreign inmates, and are, thus, *included* in the total number of foreign inmates.

MONACO

- Inmates with unknown nationality/ other considered foreign inmates, and are, thus, *included* in the total number of foreign inmates.

NETHERLANDS

- Inmates with unknown nationality/ other considered foreign inmates, and are, thus, *included* in the total number of foreign inmates.

NORWAY

- **The reference date is the 31st December 2017 instead of the 31st January 2018.**

POLAND

- Inmates with unknown nationality/ other considered foreign inmates, and are, thus, *included* in the total number of foreign inmates;
- Concerning national inmates, 166 of them have no legal status identified and 57 have other status (e.x: imprisonment to force someone to pay money that can be seen as equivalent to the profit that has resulted from criminal activity);
- Concerning foreign inmates, 36 of them have no legal status identified and 8 have other status (e.x: imprisonment to force someone to pay money that can be seen as equivalent to the profit that has resulted from criminal activity).

POLAND

- **The reference date is the 31st December 2017 instead of the 31st January 2018.**

PORTUGAL

- **The reference date is the 1st January 2018 instead of the 31st January 2018.**

ROMANIA

- Inmates with unknown nationality/ other considered foreign inmates (3), and are, thus, *included* in the total number of foreign inmates.

SAN MARINO

- Inmates with unknown nationality/ other considered foreign inmates, and are, thus, *included* in the total number of foreign inmates.

SERBIA (REPUBLIC OF)

- **The reference date is the 31st December 2017 instead of the 31st January 2018.**
- Inmates with unknown nationality/ other considered foreign inmates, and are, thus, *included* in the total number of foreign inmates.

SPAIN

- Data concerning inmates with legal resident status is not collected.

SWEDEN

- **The reference date is the 1st October 2017 instead of the 31st January 2018.**
- Citizenship is only available for sentenced prisoners.
- **Table 13:** The percentage of foreign inmates is calculated based on the total number of sentenced prisoner (instead of the total number of inmates) because data about inmates' nationality is not available for detainees not serving a final sentence, and thus only concern sentenced prisoners.

SWITZERLAND

- The reference date is the 6th September 2017 instead of the 31st January 2018.
- There are 33 inmates that can neither be considered sentenced prisoners nor detainees not serving a final sentence.
- Inmates with unknown nationality/ other considered foreign inmates, and are, thus, *included* in the total number of foreign inmates.

UK: ENGLAND & WALES

- The reference date is the 31st December 2017 instead of the 31st January 2018.
- **Table 12:**
 - Total number of national inmates also includes 52 'non-criminals' who are neither considered 'pre-trial detainees' nor 'sentenced' prisoners;
 - Total number of foreign inmates also includes 863 'non-criminals' who are neither considered 'pre-trial detainees' nor 'sentenced' prisoners.
- Data available at: <https://www.gov.uk/government/statistics/offender-management-statistics-quarterly-july-to-september-2017>.

UK: NORTHERN IRELAND

- The total number of national inmates also includes British and Irish nationalities.
- Information about nationality is missing for 1 prisoner.

Notes – Table 14 : Please See notes to Table 2.2 (p. 27).

PART B: CAPACITY OF PENAL INSTITUTIONS ON 31ST JANUARY 2018

This section includes information on the capacity of penal institutions on 31st January 2018 in each member states of the CoE which answered the SPACE I 2018 questionnaire.

Standard definitions used in Part B

- **Capacity:** Number of places available in penal institutions for the accommodation of the inmates. Are excluded all spaces that were primary designed for other needs than the proper accommodation of the inmates (e.g. storage places, classrooms, corridors, shower rooms).
- **Surface area per inmate** (calculated in square meters): This indicator should correspond to the surface *effectively* available per inmate. According to legal provisions, each inmate should dispose of individual area inside the cell, excluding common places such as shower enclosures, WC, sport areas, classrooms and other common spaces inside a penal institution.
- **Prison density per 100 places:** This indicator corresponds to the ratio between the number of inmates (including pre-trial detainees) and the number of places available in penal institutions. Generally, the indicator of prison density is used for assessment of overcrowding.

Disclaimer: Prison density and prison overcrowding

- The indicators of prison density and prison overcrowding are calculated on the basis of the data on prison capacity provided by the countries, which corresponds to their own estimation of it. The SPACE questionnaire provides a definition of overcrowding based on the design capacity of the prisons (i.e. there is overcrowding when there are more than 100 inmates per 100 places in penal institutions). Some countries use the concept of operational capacity¹² instead of design capacity¹³. As a consequence, the indicators of prison density and prison overcrowding do not allow direct cross-national comparisons.
- **Average number of inmates per cell:** Corresponds to the calculation of the average number of inmates per cell taking into account the total number of inmates (including pre-trial detainees) and the total number of cells available in penal institutions.

¹² The *operational capacity* corresponds to the number of inmates that a penal institution can actually keep while remaining functional.

¹³ The *design capacity* corresponds to the number of inmates that a penal institution was intended to keep when it was constructed or renewed.

Table 15: Compliance with the standard definition of *capacity*¹⁴

Country	Does your definition match the instructions provided?	Comments
Albania

Spain (State Adm.)	Yes	
Spain (Catalonia)	Yes	
Sweden	Yes	General Note: Data on the total capacity is an average for October 2017.
Switzerland	Yes	General Note: Data on 6 th September 2017 instead of 31 st January 2018.
Turkey		
Ukraine		General Note: Data on 2 nd February 2018 instead of 31 st January 2018.
UK: Engl. & Wales	No	The definition used is the <i>Useable Operational Capacity</i> , which is the sum of all establishments' operational capacity, less 2 000 places. This is known as the operating margin and reflects the constraints imposed by the need to provide separate accommodation for different classes of prisoner i.e. by sex, age, security category, conviction status, single cell risk assessment and also due to geographical distribution.
UK: North. Ireland	Yes	
UK: Scotland	Yes	

¹⁴ See the definition above (Standard definitions used in Part B).

Notes – Tables 16. & 17.

ARMENIA

- **Table 16:** The size of accommodation provided for each prisoner and pre-trial detainee cannot be less than 4m².

AUSTRIA

- **Table 17:**
 - In Austria there are no exclusive remand institutions. Therefore, the penal institutions which accommodate both, pre-trial detainees and sentenced prisoners, have to manage their total capacity according to their actual needs and the rule of separation between those two types of inmates.
 - The figure provided for the capacity of other types of institutions refers only to the capacity of the penal institution specialized in young offenders which is located in Lower Austria (Gerasdorf). Young offenders can also be placed in specialized departments for young offenders in other penal institutions in Austria. However since those places can also be used, in case of need, for other prisoners, it is not possible to indicate their total number.

BOSNIA AND HERZEGOVINA – REPUBLIKA SRPSKA

- **Table 16:** In certain cases, (established by the law), inmates can be in individual cells. There are 46 cells intended to accommodate one single inmate.
- **Table 17:** The figure provided for “other type of institutions” refer to 126 places in prison hospitals.

CROATIA

- **Table 16:** Non-validated figures are presented between brackets.
- **Tables 16 & 17:** The total capacity includes 122 places for juvenile offenders and 126 places in prison hospitals (which is the figure referring to the capacity of *other type of institutions*).

CYPRUS

- **Tables 16 & 17:** The capacity includes 528 places in prison institutions and 143 in police stations.
- **Table 17:** The capacity by type of institutions only concern places in penal institutions (528).

CZECH REPUBLIC

- **Table 16:** The total capacity includes:
 - Prison hospitals in Brno Remand Prison (113 places) and Praha-Pankrác Remand Prison (97 places);
 - Forensic Detention Facilities in Brno Remand Prison (35 places) and Opava Prison (50 places).
- **Table 17:**
 - The capacity of institutions for sentenced offenders includes 210 places on prison hospitals.
 - Data for the capacity of other types of institutions refers to places in forensic detention facilities (85).

DENMARK

- **Table 16:**
 - The design capacity is 4 175, however some places are inactive, therefore, the actual active capacity is 3 635;
 - There are also 7 half-way houses which have an average capacity of 189 places (in 2017), but which are not included in the total capacity figure.
- **Table 17:**
 - The actual active capacity of penal institutions for sentenced offenders is 1 622, however, the design capacity is 1 793, but some places are inactive;
 - The actual active capacity of penal institutions for non-sentenced offenders is 2 013, however, the design capacity is 2 382, but some places are inactive.

ESTONIA

- **Table 16:** Until 21 years old, the prison ensures inmates an individual cell during the day and night.

FINLAND

- **Table 16:** There are, in addition to the total capacity, 88 places in prison hospital and psychiatric hospital.
- **Table 17:** There are no specific facilities for detainees not serving a final sentence and for juvenile offenders.

FRANCE

- **The reference date is the 1st February 2018 instead of the 31st January 2018.**

GERMANY

- **The reference date is the 1st February 2018 instead of the 31st January 2018.**

GREECE

- In 2017 there has been an official recording of the capacity of Greek prison establishments per category (male, female, young offenders, juveniles, placements in semi-open agricultural prisons and in therapeutic centers for drug-addicted prisoners). To calculate the maximum capacity, the minimum criteria of the European Committee on the Prevention of Torture and Inhuman or Degrading Treatment or Punishment (CPT) of the Council of Europe (CPT/Inf [2015] 44), among others, were taken into consideration: that is 4 m² per prisoner in a cell (the wc excluded) and for dormitories 6 m² per first prisoner plus 4 m² for every other prisoner added. Dormitories are defined as spaces over 15.9 m².
- **Table 17:** Figures refer to 2017.

ICELAND

- **Table 17:** There are no special penal institutions for pre-trial detainees but in one of the closed prisons (Hólmsheiði's prison), there are 8 cells for pre-trial detainees in isolation (with a possibility to increase the number of cells for them if necessary by decreasing places for sentenced offenders).

IRELAND

- **Table 16:**
 - Non-validated figures are presented between brackets.
 - The total number of cells indicated corresponds to the number of usable cells (data taken from the January 2018 Census, which took place on 23rd January 2018), and includes 90 places in Oberstown.
 - Oberstown is certified under the Children Act 2001 for a maximum of 48 males and 6 females, aged between 10 and 18 years old.
- **Table 17:** Detainees not serving a final sentence can be held in any “closed” prison institution.

ITALY

- **The reference date is the 21st August 2018 instead of the 31st January 2018.**
- **Table 16:**
 - In Italy, the current regular capacity of penal establishments is calculated on the basis of a Decree of the Ministry of Health of 1975 relevant to civil houses; the parameters of said Ministerial Decree were wholly adopted by the Penitentiary Administration: in particular, the surface foreseen for a single room is 9m², plus 5m² for each further bed;
 - The regular capacity of Italian prison institutions is 50 517. However, the number of places actually available at the date of reference is 46 587.
- **Table 17:** The data concerning the capacity of *other types of institutions* refers to the capacity of institutions (197) for the execution of security measures.

LATVIA

- **The reference date is the 1st January 2018 instead of the 31st January 2018.**
- **Table 17:** The data concerning the capacity of *other types of institutions* (197) refers to the capacity of the prison hospital (which is part of the Olaine prison institution).

LIECHTENSTEIN

- **Table 16:** According to the 1983 Treaty on Mutual Assistance in Criminal Matters signed with Austria, whenever necessary, inmates can be held in Austrian prisons. Inmates can also be placed in Switzerland, according to an agreement with the country. Thus, the total capacity of institutions for sentenced and non-sentenced offenders takes into account these two agreements
- **Table 17:** The Prison in Liechtenstein was built for pre-trial and short sentenced as well for extradition persons, also persons which are kept in the reason of the law AUG.

LITHUANIA

- **The reference date is the 1st January 2018 instead of the 31st January 2018.**

MOLDOVA

- **Table 16:** The total number of cells (1 292) refers to all cells in detention facilities (e.g. cells, high capacity bedrooms, barracks and other types of living space for inmates).

MONACO

- **Table 17:**
 - Concerning the capacity of institutions for juvenile offenders, there are 18 places for juvenile offenders, which are *not included in the total capacity*;
 - Concerning the capacity of “other types of institutions”, there are no institutions or administrative detention centers for asylum seekers or persons in an irregular situation in the territory of Monaco. Nevertheless, there are 11 places in the premises of the Directorate of Public Security (Police) to

accommodate people in an irregular administrative situation in the territory of the Principality. There is also one place at the Princess Grace Hospital Center for people who are administratively placed by a competent authority. These places are not included in the total capacity.

NETHERLANDS

- **Table 16:**
 - Non-validated figures are presented between brackets.
 - The total capacity only refers to the adult prison system.
 - Total capacity does not include: 609 places for juvenile offenders (including 104 reserve places), 1 360 places in custodial clinics, and 933 places for illegal aliens (including 176 reserve places).
- **Table 17:**
 - Besides capacity for sentenced and non-sentenced inmates, there is the capacity that can be used for both remand and sentenced prisoners, 1 974 places in total of which 600 reserve places. The total capacity of the adult prison system is thus 10 774;
 - Data concerning the capacity of *other types of institutions* (1 974) refers to 1 360 places in custodial clinics and 933 places for illegal aliens.

NORTH MACEDONIA

- **Table 16:** Non-validated figures are presented between brackets.
- The figure concerning the total capacity is foreseen for 4m² per one inmate.

NORWAY

- **Table 16:**
 - The total capacity (4 127) includes 242 places located in Norderhaven (Netherlands);
 - There are 3 503 individual cells, 265 double cells and 24 cells for three or four inmates.
- **Table 17:** There is no distinction between institutions for sentenced and non-sentenced offenders.

PORTUGAL

- **The reference date is the 1st January 2018 instead of the 31st January 2018.**
- **Table 16:** Individual and collective cells were taken into account to calculate the total capacity.

ROMANIA

- **Table 16:** According to the order no. 2772/2017 of the Minister of Justice, there are 4 m² available per inmate in prison institutions, and 7 m² in prison hospitals (as they are not considered as penitentiary institutions and are only intended for the hospitalization of inmates, not to host them).
- **Table 17:** It is not possible to discriminate the capacity according to the type of institutions. Besides, the prison institutions resize constantly the spaces of accommodation according to inmates' age, sex, legal status etc.

RUSSIAN FEDERATION

- **Table 16:** There are 4,8 m² per inmate in prison institutions.

SERBIA (REPUBLIC OF)

- **The reference date is the 31st December 2017 instead of the 31st January 2018.**

SLOVAK REPUBLIC

- **Table 16:**
 - The total capacity of penal institutions is calculated according to legally determined accommodation area: 3.5 m² for 1 accused/sentenced man; 4 m² for 1 accused /sentenced juvenile and 1 accused/sentenced woman. An exception is the Remand Prison and Prison Bratislava, where the accommodation capacity in reconstructed areas is determined on 4 m² for everyone;
 - The accommodation area of a cell or room is determined from the total area of the cell or room after deduction of area occupied by sanitary, furniture, windows and doors.
 - In prison facilities, inmates can be accommodated in individual cells when they are available and/or when the governor decides that a specific inmate should be placed in an individual cell (to guarantee the security of the other prisoners or for other serious reasons).

SPAIN

- **Table 16:** In Spain cells are usually designed to accommodate two inmates.

CATALONIA:

- **Table 17:** There is no distinction between institutions for sentenced and non-sentenced offenders.

SWEDEN

- The total capacity is an average for October 2017.
- **Table 16:** Figures do not include the capacity of remand prisons where detainees are held for other reasons than suspicion of crime (for example inmates taken in custody awaiting deportation).
- **Table 17:** The capacity of institutions for juvenile offenders are included in the capacity of penal institutions for sentenced and non-sentenced offenders and hence indicates the number of places intended for juveniles in these institutions.

SWITZERLAND

- The reference date is the 6th September 2017 instead of the 31st January 2018.

UK: ENGLAND & WALES

- The reference date is the 2nd February 2018 instead of the 31st January 2018.
- See Table 15.
- **Table 16:** Useable Operational Capacity: This is the sum of all establishments' operational capacity less 2 000 places. This is known as the operating margin and reflects the constraints imposed by the need to provide separate accommodation for different classes of prisoner i.e. by sex, age, security category, conviction status, single cell risk assessment and also due to geographical distribution. Data available at: https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/678843/prison-pop-02-feb-2018.xls.
- **Table 17:** Data concerning capacity of *other types of institutions* (391) refers to the useable operational capacity of immigration removal centers (IRCs) operated by Her Majesty's Prison and Probation Service (HMPPS). Data available at: https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/678843/prison-pop-02-feb-2018.xls.

UK: NORTHERN IRELAND

- **Table 17:**
 - The Juvenile Justice Centre allows youths to be accommodated during the night in individual rooms, whereas the number for the prison establishments does not;
 - There is no distinction between institutions for sentenced and non-sentenced offenders.

UK: SCOTLAND

- **Table 17:**
 - There are no separate institutions for non-sentenced and sentenced inmates;
 - There is one institution for juvenile offenders in Scotland. However, two other institutions also have facilities to hold juveniles (included in the overall figure).
-

PART C: PRISON STAFF ON 31ST JANUARY 2018

This section includes information on the prison staff on 31st January 2018 in each member states of the CoE which answered the SPACE I 2018 questionnaire.

Standard definitions used in Part C

- **Staff:** Data concerning staff refers to the total number of full-time and part-time staff. Part-time staff is counted on the basis of “full-time equivalents” (FTE). For example, if two staff members are each employed for 50% of the normal working hours, they would be counted as one “full-time equivalent”. One part-time staff member working for 50% of normal working hours would be counted as 0.5 “full-time equivalent”.
- **Ratio of inmates per staff:** The ratio of inmates per staff is calculated by dividing the number of inmates (including pre-trial detainees) at 1st January 2018 by the total number of staff at 31st January 2018.
- **Ratio of inmates per custodian solely dedicated to custody:** The ratio of inmates per custodian solely dedicated to custody is calculated by dividing the total number of inmates (including pre-trial detainees) at 31st January 2018 by the total number of custodial staff solely dedicated to custody at 31st January 2018.
- **Ratio of inmates per total custodian:** The ratio of inmates per total custodian is calculated by dividing the total number of inmates (including pre-trial detainees) at 31st January 2018 by the total number of custodial staff (custodial staff solely dedicated to custody + other custodial staff).

Table 18: Compliance with the standard definition of *staff*¹⁵

Notes – Tables 19, 20 & 21

General note to Tables 20: Merged categories are not taken into account in the calculation of average and median values.

ANDORRA

- See Table 18.

AZERBAIJAN

- According to the legislation, data concerning staff are classified as secret information.

BOSNIA AND HERZEGOVINA – REPUBLIKA SRPSKA

- See Table 18.
- **Tables 19 & 20:**
 - Staff working outside penal institutions: There is no administration in the Republic of Srpska for the enforcement of criminal sanctions. Execution tasks that would be foreseen for administration are performed by 7 officers of the Office for the Execution of Criminal Sanctions in the Ministry of Justice (and thus are not employed by the penal administrations);
 - Staff working inside penal institutions: The data refer to employees in 6 correctional facilities;
- Additional information concerning staff not employed by the Prison Administration: There are 7 employees employed by the Ministry of Justice (not included in the total number of staff).

BULGARIA

- **Tables 19 & 20:** Non-validated figures are presented between brackets.

CROATIA

- See Table 18.
- The total number of staff includes 42 staff in directorate of prison system and probation.

CYPRUS

- **Tables 19 & 20:**
 - Staff working inside penal institutions:
 - Staff responsible for evaluation: Psychologists are included in the Medical and Paramedical staff. They are not employed by the Prison Administration;
 - Staff responsible for education activities: One person is the coordinator of the Prison schools. Six persons are teachers (employed by the Prison Institution).
- Additional information concerning staff not employed by the Prison Administration: There are 43 persons not employed by the P.A., of which 22 Medical and Paramedical staff (including psychologists), employed by the Ministry of Health, 19 persons responsible for education activities, employed by the Ministry of Education and Culture, and 2 social workers, employed by the Ministry of Labor, Welfare and Social Insurance.

CZECH REPUBLIC

- See Table 18.
- The total number of staff (11 069) includes 26 civilian staff members on long-term sickness leave and 17 uniformed staff members on maternity leave.
- **Tables 19 & 20:**
 - Staff working outside penal institutions: The data includes staff at Headquarters, Prison Service Academy staff and Judicial Guards serving at court buildings;
 - Staff working inside penal institutions:
 - Custodial staff solely dedicated to the custody: Data include all uniformed staff working at prison facilities (except for prevention and complaint officers), in particular perimeter security guards, officers at gates, prison guards, drivers, escort team members, K9 unit members, shift commanders, heads of security departments, heads of departments of execution of sentence and heads of pre-trial detention departments;
 - Other custodial staff: Data include prevention and complaint officers;
 - Staff responsible for evaluation & Staff responsible for education activities: These are all treatment specialists, such as special pedagogues, psychologists, social workers, etc.
 - Other staff working inside penal institutions: Refers to administrative and support staff and chaplains.
- Additional information concerning staff not employed by the Prison Administration: There are 3 persons not employed by the Prison Administration (not included in the total number of staff).

DENMARK

- See Table 18.
- **Tables 19 & 20:**
 - Staff working inside penal institutions:
 - Other staff working inside penal institutions: Data refers to administrative staff, social workers and others.

FINLAND

- See Table 18.
- **Tables 19 & 20:**
 - Staff working inside penal institutions:
 - Custodial staff: It is not possible to distinguish custodial staff solely dedicated to the custody of inmates and other custodial staff.

FRANCE

- **The reference date is the 1st February 2018 instead of the 31st January 2018.**
- See Table 18.

GEORGIA

- See Table 18.

GERMANY

- **The reference date is the 1st September 2017 instead of the 31st January 2018.**
- Additional information: on 1st September 2017 there were 2 240 trainees working on penal institutions.

GREECE

- **Tables 19 & 20:**
 - Staff working outside penal institutions: The figure refers to the staff working in Central Administration (General Directorate of Crime and Correctional Policy - Ministry of Justice, Transparency & Human Rights).
 - Staff working inside penal institutions:
 - Custodial staff solely dedicated to custody: The figure refers to the armed personnel responsible for the external security of prisons as well as for the guarding of inmates who are hospitalized and the transfer of prisoners for medical and legal reasons (to appear before judicial authorities);
 - Other custodial staff: The figure refers to personnel responsible for the internal security and everyday operation of prisons (detention wings);
 - Staff responsible for evaluation: The figure includes psychologists (26) and social workers (65);
 - Staff responsible for educational activities: Includes sociologists. Social workers are also responsible but are not counted here (they are counted as staff responsible for evaluation).
- Staff not employed by the Prison Administration: Data refers to 27 doctors, employed by the Ministry of Health).

ICELAND

- See Table 18.
- **Tables 19 & 20:**
 - Staff working outside penal institutions: The figure refers to the Prison and Probation Administration, (1 general director);
 - Staff working inside penal institutions:
 - Medical and paramedical staff: The ministry responsible for health services, subject to consultation with the PPA shall supervise and be responsible for health services to prisoners while in prison. This is why the question is not applicable;
 - In addition, there are 3.7 staff in kitchen and 0.6 responsible for cleaning.
- Additional information concerning staff not employed by the Prison Administration: The number of staff not employed by the Prison Administrations is 8.5 (not included in the total number of staff).

IRELAND

- **Tables 19 & 20:**
 - Staff working inside penal institutions:
 - Executives: Data includes head of care (1), director (2), director (higher scale) (1), deputy director (4), human resource manager (1), and clerical grade 8 (1);

- Custodial staff solely dedicated to custody: Data includes residential social care workers (119), night supervisor officers (46.5), team leaders (2) and unit managers(14.5);
- Medical and paramedical staff: Data includes clinical nurse manager (1) and clinical nurse midwife grade (2).
- Staff responsible for educational activities: Data refers to one (1) social worker.
- Other staff employed by the Prison Administration: There is currently a Service Level Agreement with the Irish Association for the Social Integration of Offenders (IASIO) to provide Training & Employment Officers (TEOs) and Resettlement Coordinators in Irish Prisons. They are members of the core multi-disciplinary team in prisons. There are 6 TEOs shared across the prison estate, provided by IASIO and funded directly by the IPS. There are 7 Resettlement Coordinators shared across the prison estate, provided by IASIO, and funded directly by the IPS. There is 1 Resettlement Officer in Cork Prison funded by the Regional Drug and Alcohol Task Force.

ITALY

- **Tables 19 & 20: Other staff employed by the Prison Administration**: Data refers to trainees (agents and technicians) participating in the respective basic training courses on the date of survey.

LATVIA

- **The reference date is the 1st January 2018 instead of the 31st January 2018.**
- See Table 18.
- **Tables 19 & 20:**
 - Staff working outside penal institutions: Data refers to staff working at the Central office of Prison Administration.
 - Staff working inside penal institutions: Custodial staff – Includes guards (perimeter guards) and guards in prison blocks.

LIECHTENSTEIN

- Staff not employed by the Prison Administration: Among the 10 persons not employed by the Prison Administrations, there are book holding, social workers, secretaries, lawyers, Doctors, psychologists, psychiatrists, forensic scientists, and a chaplain- this staff in “shared” with the police.

LITHUANIA

- **The reference date is the 1st January 2018 instead of the 31st January 2018.**
- See Table 18.
- Additional information concerning staff not employed by the Prison Administration: There are 459 staff not employed by the Prison Administration (not included in the total number of staff).

LUXEMBOURG

- See Table 18.
- Additional information concerning staff not employed by the Prison Administration: There are 67 medical and paramedical staff, 14 persons responsible for educational activities, and 58,5 other staff (all these figures are not included in the total number of staff).

MOLDOVA

- See Table 18.

MONTENEGRO

- See Table 18.
- Additional information concerning staff not employed by the Prison Administration: There are 6 persons not employed by the Prison Administration, of which 1 Director of the Institute for the Execution of Criminal Sanctions, 2 deputy directors of the Institute for the Execution of Criminal Sanctions, 1 consultant for cooperation with non-governmental organization, 1 advisor for cooperation with the public, and 1 referent for administrative-technical affairs (not included in the total number of staff).

NETHERLANDS

- See Table 18.

NORTH MACEDONIA

- See Table 18.
- **Table 19: Staff working inside penal institutions**: The figure (789) does not include staff employed in the Directorate for execution of sanctions (24 persons).

NORWAY

- **The reference date is March 2018 instead of the 31st January 2018.**
- See Table 18.

- Data only refers to prison staff. Probation and electronic monitoring staff are thus not included.
- **Tables 19 & 20:**
 - Staff working outside penal institutions: Data includes regional administrations, the national directorate of correctional services (including the national IT-division) and the transport of prisoners.
 - Staff working inside penal institutions:
 - Custodial staff: There is no distinction between staff dedicated to the custody of inmates and perimeter guards
 - Medical and paramedical staff are not employed by the Prison Administration.
 - Other staff employed by the Prison Administration: Includes administrative staff and managers not included in the category *Executives*.
- Additional information concerning staff not employed by the Prison Administration: There are 373 persons not employed by the Prison Administration, of which 123 medical and paramedical staff and 250 educational staff (not included in the total number of staff).

POLAND

- See Table 18.

PORTUGAL

- **The reference date is the 1st January 2018 instead of the 31st January 2018.**
- See Table 18.
- **Tables 19 & 20:**
 - Staff working inside penal institutions:
 - Medical and paramedical staff are not employed by the Prison Administration.
 - Other staff employed by the Prison Administration: Data include managers, senior technicians, education and social reintegration technicians and administrative staff.

ROMANIA

- See Table 18.
- **Tables 19 & 20:**
 - Staff working outside penal institutions: Data refers to staff working at the National School of Training of the penitentiary agents Târgu Ocna, Training center of penitentiary agents in Arad, Vocational and recreational staff training center of Sovata, Vocational and recreational staff training center of Amara, Vocational and recreational staff training center of Rodbav, Eforie Sud hotel "Flamingo", Center of supply, management and Repair of Bucharest;
 - Staff working inside penal institutions:
 - Custodial staff: Data refers to staff working in the safety sector the detention and the penal system which by the nature of its functions have direct contacts with inmates;
 - Custodial staff solely dedicated to custody: Refers to custody and security guards;
 - Other custodial staff: Refers to other staff working at the safety sector of the detention and the penal system which by the nature of its functions have direct contacts with inmates (by ex: escorts, visits, perimeter guards, surveillance of the access / entrance, and the registration of inmates in the prison, the group / unity of intervention etc.).
 - Other staff working inside penal institutions: Data refers to staff of the other sectors other than those included in the survey, for example: economic and administrative, management, human resources, etc.

RUSSIAN FEDERATION

- See Table 18.
- **Tables 19 & 20:** Non-validated figures are presented between brackets.

SERBIA (REPUBLIC OF)

- **The reference date is the 31st December 2017 instead of the 31st January 2018.**

SPAIN

Tables 19 & 20:

TOTAL – The figure for staff not employed by the Prison Administration refers only to the Autonomous region of Catalonia.
CATALONIA – Staff not employed by the Prison Administrations: There are 426 staff not employed by the Prison Administrations, of which 269 medical and paramedical staff and 158 teachers.

SAN MARINO

- See Table 18.

SLOVAK REPUBLIC

- See Table 18.
- Staff not employed by the Prison Administrations (additional information): An accredited educational institutions and NGOs provide selected resocialization, education and intervention programs in the conditions of imprisonment by their own employees. These employees are not employed by Prison Service and therefore they are not included in number of internal employees of the Prison Service. Their total number changes during the year depending from intensity of implemented activities.

SWEDEN

- **Data are an average for 2017.**
- See Table 18.

SWITZERLAND

- **The reference date is the 6th January 2017 instead of the 31st January 2018.**
- See Table 18.
- Additional information concerning staff not employed by the Prison Administration: There are 210 staff not employed by the Prison Administration (not included in the total number of staff).

UK: ENGLAND & WALES

- See Table 18.
- Information about staff members not employed by the Prison Administration is not held, as they are employed by other organizations and their information is therefore not held on prison records.
- **Tables 19 & 20:**
 - Staff working outside penal institutions: Data refers to area Services, HMPPS HQ and national probation service staff;
 - Staff working inside penal institutions: Data refers to youth custody service and prison service establishment staff.

UK: NORTHERN IRELAND

- Figures concerning the total number of staff include 2 recruitment agency workers engaged by Prison service as storemen.
- Staff like Teachers, social workers, medical personnel, etc., are not directly employed by the NI prison service.

Section 2: Flow indicators for the year 2017

PART D: ADMISSIONS AND EXITS DURING THE YEAR 2017

This section includes information on admissions into penal institutions and exits from penal institutions during the year 2017 in each member states of the CoE which answered the SPACE I 2018 questionnaire.

Standard definitions used in Part D

- **Admissions:** Admissions refer to all entries into penal institutions (standard definition). The counting unit is the number of admissions, not the number of persons (one person may have several admissions in the course of one year).
 - It should include: (1) admissions of detainees not serving a final sentence (pre-trial detainees), (2) admissions of persons who have been found guilty but who are not yet sentenced, and (3) admissions of persons who have been sentenced and have lodged an appeal or are within the statutory limit to do so.
 - It should exclude: (1) admissions following a transfer from one penal institution/prison to another, (2) admissions of persons following his/her removal from the institution in order to appear before a judicial authority (investigating judge, court, etc.), (3) admissions of persons following his/her removal from the institution in order to be treated in a hospital, (4) admissions of persons following a prison leave or a period of absence by permission/failure to return to the penal institutions, and (5) admissions of persons following an escape/abscond, after re-arrested by the police.
- **Rate of admissions per 100,000 inhabitants:** This indicator corresponds to the number of entries in 2017, in relation to the average number of inhabitants at the 1st January 2018.
- **Exits:** The total includes releases from penal institutions, inmates who died inside penal institutions and escapes from penal institutions.
 - It should include: (1) Exits of inmates who have been released from the penal institutions; (2) exits of inmates who died inside penal institutions, and (3) exits following an escape/abscond from the penal institutions.
 - It should exclude: (1) Transfer from one penal institution to another, (2) exits in order to appear before a judicial authority (investigative magistrate, court, etc.), (3) exits in order to be treated in a hospital, (4) placement in other (penal) institutions that do not lead to the change of the status of the detainee/prisoner, and (5) exits corresponding to a prison leave or a period of (short) absence with permission.
- **Escapes from penal institutions:** What is being counted is the person (i.e. inmates who escaped from the penal institution).
- **Rate of releases per 100,000 inhabitants:** This indicator corresponds to the number of releases from penal institutions during the whole year 2017, in relation to the average number of inhabitants at the 1st January 2018.
- **Inmates who died inside the penal institutions:** The counting unit is the person (i.e. inmates who died inside the penal institution). In principle, figures do not include (1) inmates who died or committed suicide in community hospitals, and (2) inmates who died outside prison (e.g. during a prison leave or a period of absence by permission).
- **Turnover ratio:** The turnover ratio (estimated release rate per 100 potential releases) is defined as the ratio between the number of inmates released during the year 2017 and the number of inmates held in

prison during that whole year. The latter is estimated by adding the number of persons held in penal institutions (*stock*) on 1st September 2016 (used as a proxy of the prison population on 1st January 2017) and the number of persons that entered into penal institutions during 2017 (*flow*). The Turnover Ratio (**TR**) is calculated as follows:

$$\text{TURNOVER RATIO (FORMULA)} \quad \left\| \quad TR = \left(\frac{R^{16}}{\sum(S^{17}, E^{18})} \right) \times 100 \right.$$

- **Mortality rate per 10 000 inmates:** The mortality rate per 10 000 inmates is calculated by dividing the total number of inmates who died during the whole year 2017 by the total number of inmates at 31st January 2018 (used as a proxy for the prison population in 2017), and multiplying the result by 10 000.
- **Suicide rate per 10 000 inmates:** The suicide rate per 10 000 inmates is calculated by dividing the total number of inmates who committed suicide during the whole year 2017 by the total number of inmates who died during the same period, and multiplying the result by 10 000.
- **Rate of escapes per 10 000 inmates:** The rates of escapes per 10 000 inmates is calculated by dividing the total number of escapes during the whole year 2017 by the total number of inmates at 31st January 2018 (used as a proxy for the prison population in 2017), and multiplying the result by 10 000.

¹⁶ R is the number of releases during the whole year 2017.

¹⁷ S is the number of inmates (including pre-trial detainees) on 1st September 2016.

¹⁸ E is the number of admissions during the whole year 2017.

Table 22: Compliance with the standard definition of *admissions*¹⁹

Country	Does your definition match the instructions provided?	Comments
Albania		
Andorra	Yes	
Armenia	No	There is no data concerning admissions.
Austria	Yes	
Azerbaijan	Yes	
Belgium		
BH: BiH (total)		
BH: BiH (st. level)		
BH: Fed. BiH		
BH: Rep. Srpska	Yes	
Bulgaria	NA

Notes – Table 23

ARMENIA

- See Table 22.
- Admissions following a transfer from a foreign country concerns transfers from Russian Federation.

CYPRUS

- In 2017 there were 1 726 admissions into penal institutions and 4 676 admission into police stations. Data included on table 23 only concerns admissions into penal institution.

FINLAND

- Admissions following a transfer from a foreign country include all persons who have been brought from abroad to Finland. The figure includes: 10 persons who entered Finnish prison on the basis of extradition (the person was apprehended abroad on the basis of the Nordic (NAW) or European (EAW) or international arrest warrant issued by the Finnish prosecutor (on the basis of the ongoing criminal procedure) or issued by the Criminal Sanctions Agency in order to enforce the prison sentence in Finland), and 5 transferred prisoners (the enforcement of the sentence has been decided to take over from another country into Finland).

GERMANY

- **Data relates to the whole year 2016 instead of 2017.**

GREECE

- Data only concerns newcomers in the prison system during the year 2017.

LATVIA

- See Table 22.
- In Latvia the counting unit is the person. In 2017, there were 4 615 sentenced prisoners admitted (of which 69 were transferred for abroad) and 7 624 persons were admitted in pre-trial detention.

MONTENEGRO

- In 2017, there were 3 009 inmates admitted, of which 852 were detainees and 2 157 were prisoners. The total number of admissions following a transfer from foreign country to Montenegro (69) refer to 45 detainees and 24 prisoners (of which 8 from a EU country).

NETHERLANDS

- See Table 22.
- Admissions following a transfer from a foreign country: These are the people who are convicted outside the Netherlands, but can serve their sentence in the Netherlands, based on a special law (WOTS) that makes the transference of the execution of criminal judgements possible. Inmates don't have to be born in the Netherlands, but there should be some form of bond/tie with the Netherlands (for instance because of having the Dutch nationality and living and working there). Figures concerning admissions following a transfer from a EU country are not separately available, but are included in the total number of admissions following a transfer from a foreign country (196).

NORWAY

- Admissions before final sentence: concerns admissions in remand custody.

SERBIA (REPUBLIC OF)

- Additional information concerning the total number of admissions – There were 8 345 admissions of pre-trial detainees, 6 271 admissions of persons who have been sentenced, 771 admissions of persons on treatment measures, 70 admissions of persons on educational measures. 5 537 admissions persons convicted of misdemeanor, and 7 admissions of persons in juvenile incarceration.

SWEDEN

- See Table 22.

SWITZERLAND

- See Table 22.

UK: ENGLAND & WALES

- The total number of admissions includes 54 795 remand admissions, 20 858 recall admissions (admissions following revocation of license/probation), 64 783 admission of sentenced prisoners and 251 non-criminal admissions.
- Data available at: <https://www.gov.uk/government/statistics/offender-management-statistics-quarterly-october-to-december-2017>.

UK: SCOTLAND

- Counts of Admissions are available for 2016-17 (21 583)and 2017-18 (20 224).

Table 24: Compliance with the instructions concerning the Section on *exits*²⁰

Country	1. Does your definition of "exits" match the instructions provided?	2. Does your definition of "inmates who died inside penal institutions" match the instructions provided?	3. Does your definition of "escapes" match the instructions provided?	Comments
Albania				
Andorra	Yes	Yes	Yes	
Armenia	No	Yes	No	1. Escapes from penal institutions are not included. 3. The definition of "escape" or the way of counting "escapes" does not match to the same definition used in our legislation, as the number of escapes or the attempts of escapes but not the number of persons are being taken into consideration.

Notes – Tables 25 & 26

General note to Table 26: Merged categories are not taken into account in the calculation of average and median values.

ARMENIA

- See Table 24.
- **Table 26:** Other releases refer to amnesties (5), individual pardons (10), releases for health reasons (7), public work (4), and inmates who were diagnosis a psychiatric problem (2).

AZERBAIJAN

- **Table 26:** Other releases refer to pardons (413), inmates who died (125, of which 5 due to illness), and releases due to other grounds (312).

BULGARIA

- **Tables 25 & 26:** Non-validated figures are presented between brackets.

CROATIA

- The total number of exits include exits of 2 739 misdemeanor prisoners, 35 juveniles with educational measure in correctional institutions and 9 prisoners in juvenile prison.
- **Table 26:** Data concerning releases of sentenced prisoners include 2 739 misdemeanor prisoners, 35 juveniles with educational measure in correctional institutions and 9 prisoners in juvenile prison.

CYPRUS

- See Table 24.
- **Table 26:**
 - Non-validated figures are presented between brackets.
 - Data concerning unconditional releases refer to releases of inmates who have completed their sentence.

CZECH REPUBLIC

- The total number of exits include 6 persons released from forensic detention facilities.
- **Table 26:** other releases include inmates who died, releases due to health problems and pardons.

DENMARK

- The total number of exits excludes pre-trial detainees.

ESTONIA

- The total number of exits includes the release of four people with a seriously incurable disease, the release of 3 people with psychiatric forced treatment and the sending of 5 people to a foreign country in order to serve their sentence there.

FINLAND

- Persons who escaped/absconded from prison in 2017 and who were released at the same year are counted twice to the total number of exits.
- **Table 26:**
 - Figure for releases of detainees not serving a final sentence include persons who have been returned to the country which had surrendered the person to Finland for criminal proceedings (4) and persons who have been surrendered from Finland to another country for criminal proceedings or for serving the prison sentence (51);
 - Other releases include fine defaulter (1 242).

FRANCE

- **Table 26:** the total number of releases include 15 582 detainees not serving a final sentence and 77 391 sentenced prisoners. Information about the legal status is missing for 668 released inmates.

GERMANY

- **Table 26:** Alternative reference date data concerning releases of sentenced prisoners:
 - in March 2017: 5 328 prisoners;
 - in August 2017: 4 811 prisoners;
 - in November 2017: 4 354 prisoners.

IRELAND

- **Table 26:** concerning transfers, data available at http://www.justice.ie/en/JELR/Transfer_of_Sentenced_Persons_Acts_Annual_Report_2017.pdf/Files/Transfer_of_Sentenced_Persons_Acts_Annual_Report_2017.pdf.

ITALY

- See Table 24.

LATVIA

- See Table 24.
- In 2017 2 608 sentenced persons had been released from prison for different reasons and 7 850 pre-trial detainees were released from investigation prisons.

LITHUANIA

- **Table 26:** Non-validated figures are presented between brackets.

MOLDOVA

- See Table 24.
- **Table 26:** the total number of sentenced prisoners released is 1 873, of which 1 189 unconditional releases, 356 conditional releases, 275 releases on amnesty, 1 release due to illness, 21 releases with punishment replacement, 27 releases by acquittal decision, and 4 releases due to retrial.

NETHERLANDS

- **Table 26:**
 - There were 935 people released early of which 662 left prison with special conditions;
 - Information about the legal status of released prisoners is missing for 889 inmates.

NORWAY

- See Table 24.

POLAND

- See Table 24.

SERBIA (REPUBLIC OF)

- The total number of exits refer to 8 474 pre-trial detainees, 5 242 sentenced prisoners, 771 persons under treatment measures, 77 persons under educational measures, 5 397 persons convicted for misdemeanour, and 6 persons serving juvenile incarceration.

SPAIN

- **STATE ADMINISTRATION:** It is not possible to distinguish between releases of sentenced and non-sentenced inmates, only the total is available.
- **CATALONIA:** See table 24.

SWEDEN

- See Table 24.
- Exits of non-sentenced (pre-trial detainees) are not available.
- **Table 26:** Non-validated figures are presented between brackets.

SWITZERLAND

- See Table 24.

UK: ENGLAND & WALES

- The total number of exits is a calculation based on the total number of releases, the total number of inmates who died inside prison, and the total number of escapes.

UK: SCOTLAND

- See Table 24.

Notes – Table 28

ARMENIA

- Non-validated figures are presented between brackets.

AZERBAIJAN

- In addition, 16 inmates died outside penal institutions (not included in the figures).

BOSNIA AND HERZEGOVINA – REPUBLIKA SRPSKA

- 2 inmates died in local health facilities during hospital treatment.

BULGARIA

- Non-validated figures are presented between brackets.

CROATIA

- Other causes of death refers to illness.

CZECH REPUBLIC

- In addition, 2 inmates died in community hospital after collapse in prison (out of them 1 women) and 1 died in ambulance (not included in the figures).

ESTONIA

- In 2017 one pre-trial detainee committed suicide, three sentenced prisoners died as a result of a serious illness in prison and one sentenced prisoner in a hospital as a result of severe illness.

GERMANY

- **The data relate to the year 2016 instead of the year 2017.**

ICELAND

- One prisoner died in a hospital after attempted suicide in a prison.

IRELAND

- All 9 coroner's requests are pending so cause of death cannot be confirmed.

LATVIA

- See Table 24.

LITHUANIA

- See Table 24.

MONTENEGRO

- In 2017, all inmates (2 prisoners and 1 detained person) died because of the illness.

NETHERLANDS

- 12 prisoners died outside of prison, for instance in a hospital or during a penitentiary program. These inmates are not included in the total number of inmates who died inside penal institutions.

SERBIA (REPUBLIC OF)

- Other causes refer to natural death cases.

SWEDEN

- It is not possible to exclude the number of inmates who died inside remand prisons who are detained for other reasons than suspicion of crime, for example inmates taken in custody awaiting deportation. Therefore the number of these inmates who died is included.

SWITZERLAND

- Inmates who died from natural causes or from homicide cannot be differentiated.

UK: ENGLAND & WALES

- See Table 24.
- For suicides, the definition of self-inflicted deaths is used, which is where a person has apparently taken his or her own life irrespective of intent.
- Other causes of deaths refer to an aggregated category consisting of two existing categories - 'other/non-natural' and 'awaiting further information (previously referred to as unclassified). The statistical reason for this is that the aggregated category is more suitable for determining trends and avoids a break in the time series.
- Data available at: <https://www.gov.uk/government/statistics/safety-in-custody-quarterly-update-to-march-2018>.

UK: NORTHERN IRELAND

- Causes of deaths in custody for 2017 are not yet established.

UK: SCOTLAND

- Deaths in custody are subject to *Fatal Accident Inquiries*. The outcome of 6 is known at present: 3 committed suicides and 3 died from natural causes.

Notes – Table 29

ARMENIA

- See Table 24.
- During the whole year of 2017, 1 detainee escaped from civil hospital, 1 prisoner escaped from civil hospital, but was found and arrested on the same day, and 2 prisoners attempted to escape from prison.

AUSTRIA

- Besides the 27 escapes, there were 170 more escapes that were not from penal institutions.

BOSNIA AND HERZEGOVINA – REPUBLIKA SRPSKA

- The escape refer to one inmates that did not return from holiday permission on time.

CROATIA

- Escapes from other type of institutions refer to escapes from semi-open penitentiaries.

CYPRUS

- One inmate had escaped from the Prison Institution and was arrested a few hours later.

ESTONIA

- Data does not include detainees who were permitted to move outside the territory but who did not come back.

FINLAND

- Data does not include failure to return in time from leave.

GERMANY

- **Data relates to the whole year 2016 instead of 2017.**
- Data include the following scenarios:
 - escape from the fenced area of a penal institution by one's own means or with the help of third persons;
 - escape while the prisoner is escorted by prison staff on short leave or to appear before a court;
 - escape during prisoner transportation conducted by prison staff;
 - escape during a stay in hospital outside of the prison, if the prisoner was guarded by prison staff;
 - escape during outside work under supervision of prison staff.
- Data does not include the following scenarios:
 - attempted escape;
 - escape where the prisoner is recaptured;
 - non-return or late return from unsupervised work outside of the prison, from a (long-term) unsupervised stay outside the prison, from temporary leave or following an interruption of sentence;
 - escape by one's own means or with the help of others from holding cells at court, police stations or other authorities where prisoners are kept under the supervision of staff members of said authorities;
 - accidental release of prisoners on account of an identity mix-up.
- The sum of escapes from closed institutions and from other type of institutions does not correspond to the total number of escapes because there are uncounted cases (38) involving persons who escaped under different circumstances, namely while being escorted by prison staff on short leave or to appear before a court, during prisoner transportation conducted by prison staff, during a stay in hospital outside of the prison, if the prisoner was guarded by prison staff, during outside work under supervision of prison staff.

GREECE

- According to the Greek Correctional Code (art. 19), there are the following type of detention facilities: a) General Detention Facilities Type A and Type B for sentenced offenders and pre-trial detainees, b) Special Detention Facilities for young offenders (sentenced and pre-trial), semi-open agricultural units and Central Warehouse of Prison Material (KAYF) and c) Therapeutic Facilities (Prison Hospital, Prison Psychiatric Hospital and Therapeutic Centre for Drug-Addicted prisoners). All these detention facilities are considered closed (for answering question 5.3) apart from semi-open agricultural prisons and Central Warehouse of Prison Material (KAYF).
- There are also 72 more cases that are breach of leave.

ICELAND

- One prisoner escaped while working in an open garden in front of a closed prison.

IRELAND

- In 2017, 11 children absconded/escaped or did not return from home leave from Oberstown Children Detention Campus. 2 of them escaped from Campus, 4 absconded whilst under supervision outside the Campus and 5 did not return from home leave when they were due to return.
- 10 prisoners absconded from Open centres - Shelton Abbey (6), Loughan House (4).

MONTENEGRO

- In 2017, 2 prisoners escaped. One prisoner did not return from benefit which he used during the enforcement of sentence of imprisonment or the sentence of imprisonment of forty years. This benefit is proscribed by the Law on enforcement of sentence of imprisonment, fines and security measures (article 32). The second one was on Interruption of Sentence Enforcement in accordance with the Law on enforcement of sentence of imprisonment, fines and security measures (article 36).
- 3 inmates who escaped returned from the escape.

NETHERLANDS

- There were 419 absconds (including not returning - on time - from leave).

NORTH MACEDONIA

- Besides the 40 escapes, there were 42 persons (not included neither in the total number of exits nor in the number of escapes), that did not return from Abscends with permission.

ROMANIA

- Data relates to inmates who escaped during leaves for working.

RUSSIAN FEDERATION

- Data include escapes from supervision, including from colonies.

SERBIA (REPUBLIC OF)

- See Table 24.
- There are two forms of escapes:
 1. Inmates (convicted persons or pre-trial detainees under the supervision of the Prison Administration) who escaped from a closed penal institution or during an administrative transfer (e.g. to/from a court, another penal institution, a hospital) – 0 inmates;
 2. Other forms of escape (absconding or running off) for example: by prisoners in open institution (e.g. work farms), in semi detention, during authorised short- term absence (or leave) from all types of institutions (including closed prisons) –26 inmates.

SLOVAK REPUBLIC

- 2 inmates escaped from the workplace while they were under surveillance, supervision or free movement.

SPAIN

- Escapes from other type of institutions refers to escapes from Open Departments and Social Insertion Centres (open regime)

SWEDEN

- It is not possible to exclude the number of inmates who escaped from remand prisons who are detained for other reasons than suspicion of crime, for example inmates taken in custody awaiting deportation. Therefore, the number of these inmates who escaped is included.
- Inmates who escaped during an administrative transfer or during authorised short-term absence are included.

UK: ENGLAND & WALES

- Figure provided on the total number of inmates who escaped from penal institutions consists of escapes for financial year 2017/18. These figures exclude escapes from HMPPS Escorts. Data is published in the Ministry of Defence bulletin 'Annual HM Prison and Probation Service digest: 2017 to 2018' and can be accessed via the following link: <https://www.gov.uk/government/statistics/annual-hm-prison-and-probation-service-digest-2017-to-2018>; table titled 'Chapter 1 tables - Escapes, absconds, failure to return from ROTL, releases in error' and the number of escapes are taken from table 1.1.
- Escape incident: An incident is deemed to be an escape and included in the annual total if (i) the prisoner is at liberty for 15 minutes or more before recapture or (ii) an offence is committed during an escape lasting less than 15 minutes.

UK: SCOTLAND

- Figures are available for 2017-18. There were two 'escapes' in 2017-18. One from a closed institution and one from an open prison.

PART E: LENGTH OF DETENTION DURING THE YEAR 2017

This section includes information on the length of detention during the year 2017 in each member states of the CoE which answered the SPACE I 2018 questionnaire.

Standard definitions used in Part E

- **Length of detention:** Corresponds to the total number of days spent in penal institutions by all persons who spent at least one day in custody. No distinction is made between periods of detention pending a court decision and the time spent serving sentenced and also other circumstances such as civil prisoners, fine defaulters and administrative detention.
- **Average number of inmates:** By dividing the number of days of imprisonment by 365 (366 in leap years) we obtained the "average number of inmates in the year.
- **Indicator of average length of imprisonment (based on the total number of days spent in penal institutions) – IALI –:** This indicator is expressed in months and corresponds to the quotient of the average number of inmates in 2018 (**P**) by the flow of admissions during the whole year 2017 (**E**), multiplied by 12 (months). The formula used to calculate this indicator is the following:

$$\text{IALI (FORMULA)} \quad \left| \quad D = \left(\frac{P}{E} \right) \times 12 \right.$$

- **Indicator of average length of imprisonment (based on the total number of inmates):** As some countries do not provide data regarding the total number of days spent in penal institutions, or provide figures that do not seem reliable the indicator of the average length of imprisonment is also calculated by using the total number of inmates on 31st January 2018 (instead of the total number of days spent in penal institutions).

Table 30: Compliance with the standard definition of *Length of detention*²¹

Country	Does your definition match the one provided?	Comments
Albania		
Andorra	Yes	
Armenia	***	
Austria	Yes	
Azerbaijan	Yes

Notes – Table 31

ARMENIA

- Penitentiary Service of Republic of Armenia does not collect data concerning to the length of detention.

BOSNIA AND HERZEGOVINA – REPUBLIKA SRPSKA

- The total number of days spent in penal institutions is calculated by multiplying the average daily number of inmates by the number of days of the year.

CYPRUS

- The total number of days spent in penal institutions corresponds to the sum of the number of days spent in prison (228 570) and in police stations (11 837).

GERMANY

- **Data relates to the whole year 2016 instead of 2017.**

GREECE

- See Table 30.
- The calculation was based on the average number of prisoners per day within the year 2017. Consequently, the above numbers are the average of the number of days spent in penal institutions.

LATVIA

- See Table 30.

NETHERLANDS

- Concerning the days spent in penal institutions, in total 1 851 280 were spent by sentenced prisoners. There are 66 430 days for which it is unknown whether they were spent by a pre-trial or sentenced inmates.

PORTUGAL

- The total number of days spent in penal institutions is calculated by multiplying the average daily number of inmates by the number of days of the year.
- The total number of days spent in institutions for detainees not serving a final sentence is calculated by multiplying the average daily number of detainees by the number of days of the year.

SLOVAK REPUBLIC

- See Table 30.

SWEDEN

- It is not possible to exclude the number of days spent in remand prisons by inmates who are detained for other reasons than suspicion of crime, for example inmates taken in custody awaiting deportation. Therefore the number of days spent by these inmates is included.

UK: ENGLAND & WALES

- The total number of days spent in penal institutions is an average of the 12 month-end prison population snapshots in 2017, multiplied by 365.
- The total number of days spent in pre-trial detention is an average of the 12 month-end prison population in remand detention snapshots in 2017, multiplied by 365.
- Data available at https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/676246/prison-population-q4-2017.xlsx

PART F: COSTS OF IMPRISONMENT DURING THE YEAR 2017

This section includes information on the costs of imprisonment during the year 2017 in each member states of the CoE which answered the SPACE I 2018 questionnaire.

Standard definitions used in Part F

- **Budget spent by penal institutions (costs of imprisonment):** The costs of imprisonment refer to the total budget effectively spent by penal institutions. The total budget should include costs of security, health care (incl. medical care, psychiatric services, pharmaceuticals, dental care, etc.), services (incl. maintenance, utilities, maintenance of inmate records, reception, assignment, transportation, etc.), administration (excl. extra-institutional expenditures), support (incl. food, inmate activities, inmate employment, clothing, etc.), and rehabilitation programs (incl. academic education, vocational training, substance abuse programs, etc.).

Table 32: Compliance with the standard definition of *costs of imprisonment*²²

Country	Does your definition match the instructions provided?	Comments
Albania		
Andorra	No	The budget is divided according to three sections: 1. 3,592,053.61 € for general services of penitentiary institutions; 2. 205,530.61 € for sanitary, reinsertion and minors; 3. 112,595.52 € for custody and Execution of prison sentences and of measures.
Armenia	Yes	
Austria	Yes	
Azerbaijan	Yes	
Belgium		
BH: BiH (total)		
BH: BiH (st. level)		
BH: Fed. BiH		
BH: Rep. Srpska	Yes	
Bulgaria	Yes	
Croatia	Yes	
Cyprus	No	The total budget does not include health care costs.
Czech Rep.	Yes	
Denmark	Yes	
Estonia	Yes	
Finland	No	The total budget also includes rental costs for facilities.
France	Yes	
Georgia	Yes	
Germany	Yes	General note: Data relates to the whole year 2016 instead of 2017.
Greece	No	When inmates are hospitalized in public hospitals, the cost charges the budget of Ministry of Health.
Hungary		
Iceland	No	Total budget does not include health care nor costs for prisoner's education.
Ireland	Yes	
Italy	Yes	
Latvia	Yes	
Liechtenstein	Yes	
Lithuania	Yes	
Luxembourg	Yes	
Malta		
Moldova	Yes	
Monaco	NA	
Montenegro	Yes	
Netherlands	Yes	
North Macedonia	Yes	
Norway	No	3. The total budget does not include health care expenses. 4. Data only include costs for prison, costs for the directorate or regional administrations are therefore not included. 5. Costs for Norgerhaven prison are not included
Poland	NA	
Portugal	Yes	General note: Data relates to the whole year 2016 instead of 2017.
Romania	Yes	
Russian Fed.		
San Marino	NA	
Serbia (Republic of)	Yes	
Slovak Rep.	Yes	
Slovenia	Yes	
Spain (total)	Yes	
Spain (State Adm.)	Yes	
Spain (Catalonia)	Yes	
Sweden	No	Overhead costs for main office and regional offices, depreciations and costs for facilities are included.
Switzerland	NA	
Turkey		
Ukraine		
UK: Engl. & Wales	NA	
UK: North. Ireland	No	The total budget does not include healthcare costs
UK: Scotland	Yes	

²² See the definition above (Standard definitions used in Part F).

Notes – Table 33

ANDORRA

- See Table 32.
- The Andorran Penitentiary Center is located in a single building, therefore it is not possible to present data concerning costs for sentenced and non-sentenced inmates separately.

AUSTRIA

- It is not possible to present data concerning costs for sentenced and non-sentenced inmates separately.

AZERBAIJAN

- For 2017, the average exchange rate of the euro was 1.98 manats.

CYPRUS

- See table 32.

CZECH REPUBLIC

- The budget includes, salaries of uniformed and civilian staff, retirement pensions and retirement benefits for former uniformed staff, sickness benefits of uniformed staff, renovation and modernization of movable property and immovables, security at court and public prosecutor's buildings, IT services and equipment, hygienic items for prisoners, anti-drug programs and crime prevention programs.
- Exchange rate as for 29th December 2017.

FINLAND

- See table 32.

GEORGIA

- The average exchange rate of GEL to EUR (as of 2017) = 2.837.

GERMANY

- Data relates to the whole year 2016 instead of 2017.

GREECE

- See table 32.
- When inmates are hospitalized in public hospitals, the cost are charged to the Ministry of Health.

ICELAND

- See table 32.

IRELAND

- The average amount spent per day for the detention of one person in juvenile detention is 1 036 €, and the average for the detention of non-sentenced juvenile is 1 036 €.

LUXEMBOURG

- Data include partial expenses related to staff not employed by the penal administration.

MONACO

- The average amount spent per day for the detention of one inmate is calculated by dividing the total budget spent in 2017 by the number of days of detention in 2017.

NETHERLANDS

- Data refers to adults only.
- The average amount spent per day for the detention of one inmate corresponds to the price of a standard closed place in a House of Detention/closed prison (including overhead costs).
- Places in Psychiatric Penitentiary Complexes (5 places) which are meant for detainees not serving a final sentence as well as sentenced prisoners, are more expensive – 517 € per day (including overhead costs).

NORWAY

- See table 32.

PORTUGAL

- Data relates to the whole year 2016 instead of 2017.

RUSSIAN FEDERATION

- Non-validated figures are presented between brackets.
- Average exchange rate CB RF from 2017 for Euro in Russian Federation: 1 Euro = 65.87 rubles.

SPAIN

- The total budget is the sum of total budget of the General State Administration (1 119 290 708.51 €) and the total budget of Catalonia (3 42 246 332.89 €).

-
- In Security, only costs concerning the security of the Central Services headquarters are included. The actions of the *Society of Penitentiary Infrastructures and Equipment* are not included, nor are the expenses of the State Security Forces in charge of the surveillance of prison perimeters and inmate transfers.

SWEDEN

- See table 32.
- It is not possible to exclude the costs of the non-sentenced inmates who are detained for other reasons than suspicion of crime (for example inmates taken in custody awaiting deportation). Therefore the costs for these inmates are included.

UK: ENGLAND & WALES

- Data refers to the financial year 2016-17 and is available at <https://www.gov.uk/government/statistics/prison-performance-statistics-2016-to-2017>.

UK: NORTHERN IRELAND

- See Table 32.
- Total budget: £111 154 000 (conversion made on 8 October 2018) → £1 = 1.14 Euro.
- Average amount spent per day: £684 (conversion made on 8 October 2018).

UK: SCOTLAND

- The Scottish Prison Service budget for 2107-18 was £331 518 000. As at 8th November 2018, that is the approx. equivalent to 379 967 538.68 euro.
-
