Breaking Down Legal Jargon with AI

Mardi 4 février 2025

17.20 – 18.00

Internef – 271

Intervenant·e·s

Galileo Sartor, Swansea University
Giovanni Sartor, University of Bologna
Aurelia Tamò-Larrieux, UNIL
Marco Lippi, University of Florence

The process of turning legal rules into clear, logical statements has been explored for a long time. This method is especially useful because it enables legal processes to be automated while staying understandable for people. However, translating legal rules into precise logic is not easy. Could large language models (LLMs) help with this? And what if these logical statements of legal norms get reintroduced into the training of LLMs? In this panel, we discuss the exciting possibilities for innovation that the combination of traditional rule-based AI and modern LLMs offers!

AI meeting IP: Art, NFTs and IP rights in the digital age

Vendredi 7 février 2025

14.00 – 15.30

Internef – 271

Intervenant·e·s

Nathalie Dietschy, UNIL
Pascal Favrod-Coune, Aegis Partners and UNIL
Michaela MacDonald, Queen Mary University of London
Spyros Maniatis, BIICL
Eva Lein, UNIL

In a world in which generative AI pushes the boundaries of digital content creation, lawyers face new legal challenges. This panel looks at issues arising from different forms of Art created by AI, the legal challenges of NFTs, copyright protection in AI-generated works and trademark law. The panel provides an interdisciplinary and comparative perspective on a topic of increasing practical importance.
