

Network for sport studies

TWO main objectives

Attract, consolidate and apply new research competences covering every aspect of sport (elite, leisure, health, physical education, etc.)

Develop multi-disciplinary research and provide consulting services (performance, doping, health, governance, etc.)

Twelve research fields

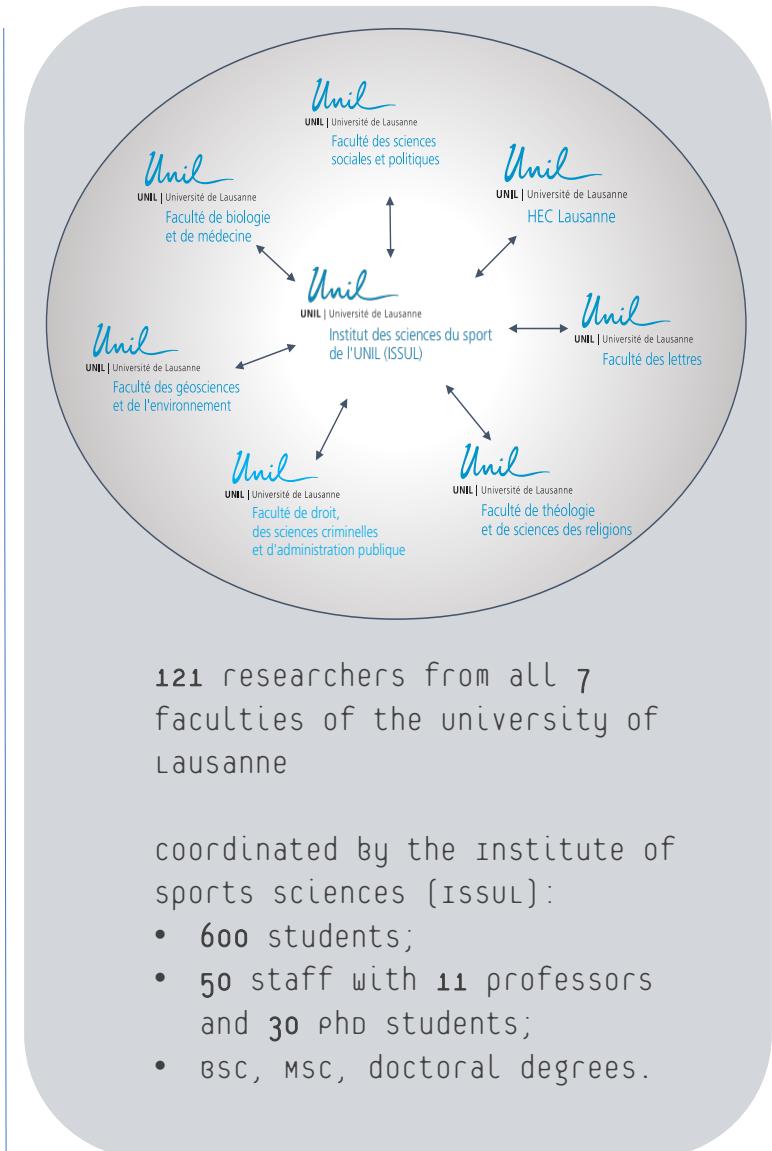

Some examples of research programs

- Professionalization of international federations (prof. E. Bayle)
- Youth and sports movements in Rwanda, francophone West Africa and Uganda (prof. Nicolas Bancel)
- Biological and physiological passports (prof. M. Saugy)

- Altitude training for team sports (prof. G. Millet)
- Prevention of doping in road cycling (prof. F. Ohl)
- History of the Paralympics (prof. N. Bancel)
- Monitoring of online social networks and open data on doping (forensic sciences - Interpol)

one structure

121 researchers from all 7 faculties of the university of Lausanne

coordinated by the institute of sports sciences (ISSUL):

- 600 students;
- 50 staff with 11 professors and 30 PhD students;
- BSC, MSc, doctoral degrees.
