Information for LNDS doctoral candidates participating in the annual Alpine Brain Imaging Meeting (ABIM) organized by UNIGE

- Registration and accommodation fees are not automatically taken over by the LNDS, you need to apply for an LNDS travel grant (see HERE for details). Latest deadline is December 15 of a running year.
- You could ask for the reimbursement of your train travel via the LNDS without a travel grant application (please see HERE for details).

Since ABIM is a local conference with international participants (not a "major international conference" automatically worth 1 ECTS), you can obtain **ECTS study credits** the following way:

A) If you do NOT present a poster or talk:
(A1) without assessment task below >>> please put 3 entries on your LNDS seminar sheet
(A2) with assessment task below >>> you get 0.5 ECTS after sending your ABIM summary to the LNDS coordinator

B) If you DO present a poster or talk:
(B1) without assessment task below >>> you get 0.5 ECTS after sending your talk or poster number as in the ABIM booklet to the LNDS coordinator
(B2) with assessment task below >>> you get 1 ECTS a after sending your talk or poster number as in the ABIM booklet to the LNDS coordinator AND your ABIM summary

ABIM assessment task

Write a one-page document summarizing what you learned from the talks, posters and discussions during the conference (make references to the presentation you are referring to as to show that you actively participated in the event) or what future project idea(s) you maybe had based on the interactions with other participants or by listening to the presentations.

Send your ABIM summary (pdf with your name as file name please) the LNDS coordinator by March 15 of the conference year.
